DISCUSS PLAN FOR NEW FIRE HOUSE AND APPARATUS

The special fire committee of the Daly City Board of Trustees met last Tuesday evening with the Fire Commissioners for the purpose of discussing plans for a new fire house and for necessary fire apparatus.

The plans will be turned over to an architect for development and perfection, it is understood. The proposed site of the new fire house is on the property just east of St. Maximus church.

According to present plans, it is understood that a bond issue would be floated to cover the cost of the improvement, and that a small paid company, in addition to several volunteer fire companies, would be employed.

BANQUET FOLLOWS BABE'S CHRISTENING

On Easter Sunday Mr. and Mrs. D. Battye had their baby daughter christened at St. Maximus church. The baby was christened Marilyn Rose. The godmother was Miss Caroline Spani, and the godfather Mr. Gus Wissel.

After the christening a banquet was held at the parents' beautiful new home on the corner of Acton and Winchester streets. The tables were artistically decorated with Easter decorations and flowers. After the dinner the guests enjoyed games and dancing. The music was furnished by Mr. Barnes and Mrs. Renner, of Mountain View.

Among the guests were: Mr. and Mrs. L. Spani (grand parents), Mrs. M. Wissel (grandmother), Mr. and Mrs. F. Klinger, Mr. and Mrs. C. Spillane, Mr. and Mrs. D. Sweeney, Mr. and Mrs. J. McCormick, Mr. and Mrs. W. Lavin, Mr. and Mrs. Gus Wissel, Mr. and Mrs. Ed Hurilhy, Mr. and Mrs. W. Wilson; Misses Augusta, Caroline and Frances Spani, Grace Lavin, Fernande Delort, Evelyn and Edythe Wissel; Messrs. Jack Lavin, Dannie Sweeney, Johnnie Kuchac, Louis Bertetta, Eddie Lavin, Milton Engdobl, Frank Bachard and Louis Renner. Mrs. Battye was formerly Mary Spani.

EASTER SERVICES AT GRACE CHURCH

The Easter services at Grace Presbyterian church were a real joy and uplift to the very large congregation of people assembled for all the services of the day.

The 7 o'clock praise service on the hill was fine, the address of Rev. Jones of the Daly City M. E. church being to the point and a help to all.

The Sabbath school was overflowing, as all could not get seats, and the public worship following was still more crowded. Dr. Vander Las baptized four people, and two were added to the church membership. The flowers and decorations were in keeping with the day.

Twenty-four came to the Young Peoples' meeting of the Christian Endeavor and a splendid service was held.

We can truly say that it was a great Easter time for the church here at this place, as the weather was more than ideal.

The theme for the sermon next Sabbath evening will be, "The Drawing and Holding Church." Special music will be had for the service.

Beginning one week from next Sabbath, some of the topics of the day will be discussed at the service, viz.: "Why Don't Men Go to Chuch?" Why Don't Women Stay at Home?"

WRECKS PARKED CAR TO SAVE TOT'S LIVES

Adolph Peterson, a carpenter of Daly City, will probably be in the market for a new car as the result of an accident at Burlingame last Tuesday.

Choosing between an empty automobile and one filled with children, W. N. Hansen, of Fresno, guided his heavy motor truck into Peterson's car which was parked on the state highway near Easton drive. The car was crushed into a worthless mass against a huge eucalytus tree by the force of the collision and the weight of the truck. Had there been any one in the car, they could not have escaped a horrible death.

"It was my only alternative," Hansen told officers investigating the accident. "When a speeding machine cut through the traffic lane at Easton drive and pointed straight for me, I had no way of preventing him from hitting me other than to pull sharply to the right. I could see I was going to crash into the parked car, but it was better than crushing out the lives of those innocent children in the other car."

COUNTY CHAMBER ON FIRM FOOTING

Formal reorganization of the San Mateo County Chamber of Commerce was completed last Monday at a meeting of the county supervisors at Redwood City. Fred H. Drake, of San Carlos, was named president and Roscoe W. Wyatt, manager. Ira Potter, of South San Francisco, was named vice-president, and Walter W. Kellogg, of Redwood City, treasurer.

Drake announced a budget of $9,000 for advertising, on which the chamber will be conducted until county funds are available. Of this sum, $2,000 has already been secured by public subscription, which is to supply the balance, he reported.

The county booster body is now in working order, and is expected to prove of great benefit to all San Mateo county.

A letter was received from the State Highway Commission, acknowledging receipt of a resolution for a hearing on construction of the May Shore highway to Beresford, and immediate action was promised.

On application of A. D. Walsh, of Redwood City, for a hearing on insurance for county property, the board voted to hold an executive session in the near future when the matter will be decided.

Hearing on a petition for formation of a lighting district at Emerald Lake was set for May 16.

The board accepted a deed to streets in Bayshore Park, subdivision near Dumbarton, and set May 16 as the date for hearing on street work for the subdivision, following adoption of a resolution of intention.

ALUMNI ASSOCIATION TO DANCE ON MAY 13

One for the money, two for the show, three to make ready and four to go to the first affair of the Jefferson Uinon High School Alumni Association.

"That's that!"

"That's what?"

"Alumni's first dance."

"Dance? What sort?"

"Friday the 13th, and you know what that means."

"Of course! Some superstitious affair."

"Going?"

"When?"

"Don't be so dumb. May 13th, Friday evening at 8 o'clock sharp."

"Where?"

"Where? At the high school auditorium, naturally."

"Oh, I won't go. The music is never any good; there's never much of a crowd. Guess I won't go."

"Well, I hope you don't feel hurt by not going, but Fred Lamb's—the jazziest orchestra on this side of heaven—is going to play, and the dance is something different. There will be a prize waltz and a prize fox trot. How does that look to you, old stick in the mud? Also I'll have you to understand that each dance will be named after some ill omen."

"Why ill omen?"

"Oh! Why did they take George Washington and let you live? Because it's Friday the 13th. Stupid! Understand?"

"Oh, say! Not so bad as that is it? Um, um, um, guess I'll take a peek in. Oh, how'll I get in? Gosh! I most forgot."

"Get your bids from the members of the Alumni. Rosa Bauer, Marc Worst, Martha Worst, Ed Goldkuhl, Albert Saarinen and Mildred Ross are in charge of this special program. Oh, yes, and don't forget, you can obtain them from the students of Jefferson Union high school. Of course I mean the bids. Well, I guess I'll leave you until next week, and I'll see how you and your friends feel about it then. So long."

"So long. I have a funny feeling that I'm going. Good bye."

ROSA BAUER.

HIT-AND-RUN VICTIM IS FOUND IN DITCH

Emil Bihn, aged 44, of Chicago, was found lying in a ditch beside the road near Beresford, where he was thrown by a hit-and-run motorists, and is in the Mills Memorial hospital in a serious condition.

Bihn was found by Mr. and Mrs. Gerald Anthony, of San Francisco, who noticed the injured man waving a handkerchief and stopped to see what he meant by his signaling. The injured man declared he had been endeavoring to attract the attention of passing motorists for some time by waving his handkerchief and calling out as best he could, but his signals went unheeded until Mr. and Mrs. Anthony stopped.

He had been walking from Los Angeles to San Francisco and was run down by a motorist who failed to stop and render him assistance. He had been lying in the ditch about an hour before he was rescued and taken to the hospital.

WILL MAKE WAR ON TRUCKS THAT DAMAGE ROADS

A determined campaign, designed to protect the state highways by ridding them of trucks deliberately loaded beyond the legal weight, will be launcehd within the next few days by the Division of Motor Vehicles, it has been announced.

At least five crews, headed by an inspector and equipped with weighing scales, will be put in the field immediately, it was stated, with orders to stop any truck suspected of having been overloaded and check its weight.

Acting under orders of Chief Frank G. Snook, the state has been divided into districts by Chief Inspector C. K. Harder. The crews will be assigned to these districts with instructions to investigate all reported highway damage resulting from excessive loading.

The legal maximum for four-wheel trucks in the state is 22,00 pounds.

"We have reason to believe," said Harder, "that many truck drivers have exceeded this maximum several thousand pounds, with much resultant damage to the highways. Trucks operating in industrial districts where iron and steel materials are hauled will receive particular attention."

More crews will be added if needed to make the campaign effective, it was announced. In addition to these steps, orders have been issued to traffic officers throughout the state to keep close check on all trucks in their district for overloading.

VANDALS STRIP YARD OF BEAUTIFUL BLOOMS

There seems to be little encouragement for one to try to do their part in making the home town beautiful with flowers, shrubbery and lawns, and then have vandals break and climb over the fence and steal choice flowers and shrubery. Last Friday night C. M. Shoup lost a hundred or more of his finest tulips, some one evidently thinking that Easter time was a good time to purloin the same. Every bloom was stolen and plants that were not carried away were pulled up and left on the ground. Among the flowers taken were double tulpis of a rare species, which Mr. Shoup valued very highly, they being of a species rarely seen.

Such action of vandals makes it most discouraging for one to try to grow flowers, and it is hoped the miscreants may be captured and severely punished for their misdeeds.

WEAVER MUST FACE CHARGE OF MURDER

William K. Weaver, San Bruno plumber, charged with the murder of his wife, was bound over to the Superior Court when he came up for preliminary hearing late Monday in the court of Judge Ellis C. Johnson at Daly City. Weaver is alleged to have shot his wife, Verna, on March 12, when he returned to his home and found the doors locked against him. She died in the Community hospital three days later.

BUILDING PERMITS FOR WEEK

City Clerk B. C. Ross reports the following building permits for the week:

Horace Fellows, 118 Peoria street, four rooms.

D. R. Dewitt, 6280 Mission street, raising and addition.

Charles Anderson, 6259 Mission street, store and flat.

Excelsion Builders Co., 294 Hillcrest Drive, four rooms and garage.

Lindgren Bros., 328 Lowell street, five rooms and garage; 334 Lowell street, five rooms and garage.

John Van Huesden, 47 Woodrow street, five rooms and garage; 227 Irvington street, five rooms and garage.

H. Shapiro, 4 Woodrow street, five rooms and garage; 8 Woodrow street, five rooms and garage; 12 Woodrow street, five rooms and garage; 16 Woodrow street, five rooms and garage.

CELEBRATES SIXTH BIRTHDAY

Saturday, April 16, Anita Welch, 11 Theta avenue, entertained a few of her little friends and some grown-ups, in honor of her sixth birthday. Delicious refreshments were served on a beautifully appointed table, and all wished Anita joy and hoped she would have many more birthdays. Among the children present were Anita and David Welch, Peggy Prescott, Melvin Williams, Jessie Hart, Guinevere Callsen, Peter and Paul Talovia and Elizabeth Frubauer, of San Francisco. Also Rev. Arthur Jones, Mrs. Stanley Williams, Mrs. Alice Prescott, Mrs. Alice Rannenberg and Mrs. Cora Howell, of San Francisco.

SCHOOL SAFETY POSTERS ADOPTED IN MANY CITIES

Public schools in six counties and thirty-five cities in Northern and Central California have adopted the program of visual education in traffic safety inaugurated by the California State Automobile Association to reduce the toll of children in street and highway accidents, it is announced by Percy E. Towne, chairman of the Association public safety committee.

In 4,973 classrooms, boys and girls are being given regular instruction in safe conduct on streets and highways under arrangements made by the Association public safety department with school principals, boards of education and school superintendents, who have officially approved in each instance the plan of displaying posters graphically portraying the hazards of modern traffic.

Schools in six entire counties have adopted the system which calls for keeping the posters constantly on display in the classrooms after they have been made the subject of lessons by the teacher. These counties are San Joaquin, Humboldt, Lassen, Amador, Tuolumne and Calveras.

Cities in which school authorities have adopted the Association safety posters as part of classroom work are Hollister, Willows, Red Bluff, Eureka, Sausalito, San Anselmo, Mill Valley, San Rafael, Millbrae, Belmont, San Carlos, Redwood City, South San Francisco, Burlingame, Salinas, Santa Rosa, Sonoma, Merced, San Mateo, Piedmont, Alameda, Manteca, Oakland, Hanford, San Jose, Santa Cruz, Fresno, San Francisco, Hillsborough, Susanville, Orland, Martinez, Vallejo, Lodi and Tracy.

The Association public safety department supplies a new poster each month for each classroom and furnishes teachers with suggested lessons for the children. This Association activity is in addition to the work of the motorists' organization in forming public school traffic reserves in many cities, under which older boys protect their schoolmates in traffic on streets near school buldings. The Association has also posted school areas with warning signs.

TOWNE REPORT SHOWS SHORTAGE OF $80,035

A report of the auditors showing the condition of the accounts of the late Frank K. Towne, Redwood City treasurer and tax collector, was filed Monday night with the city clerk by the board of trustees. Towne's total shortage was $80,035, the report reveals. Included in the missing money is a $30,000 bond issue for the extension of Broadway, Redwood City, it was stated. Other moneys included a large portion of the first installment of city taxes and minor funds. The city attorney announced that the four bondsmen of Towne would be notifed that the report has been filed, so that they may examine it. Towne was bonded for $20,000.

City Attorney Mansfield said that he did not believe that there would be any suits necessary to recover the missing money. He said he believed the bondsmen would make good their bond immediately after examination of the report and that the remainder of the money would be secured from Towne's estate.

HOMESTEAD MADE PART OF SAN MATEO

Final steps in the annexation of the Homestead sanitary district to San Mateo were taken by the San Mateo city council Monday night with the adoption of an ordinance given its first reading at an adjourned meeting a week previous. Annexation of the district was almost the first official act of the new council. The ordinance will be in effect with the filing of a copy at Sacramento, to be made within the immediate future.

SAN BRUNO SCENE OF ANOTHER COLLISION

San Bruno was again the scene of a collision between a train and an automobile last Tuesday, when the machine operated by W. S. Sampson, of San Bruno, was struck by a northbound freight train at the Scott street crossing. Although his auto was dragged for nearly 75 feet before the heavy freight train could be brought to a halt, Sampson was only slightly cut and bruised, but his machine was demolished by the crash.

Watchman is Found Dead

Daniel Terry, aged Menlo Park night watchman, was found dead early Monday morning in his home. The aged man was found lying across his bed, apparently the victim of a heart attack. The covers of his bed had been thrown back, and it is believed he was stricken when about to retire.

DUMBARTON ROW FINALLY SETTLED

The battle of rights-of-way to the San Mateo county end of the Dumbarton vehicular bridge was at an end Monday afternoon and automobile traffic resumed its travel over the Carlton road, which was closed Saturday.

The closing of the road resulted in a near riot Sunday night when scores of automobile parties returning to San Mateo county via the bridge decided to use the closed streets, and did so, over the protest of A. L. Madden, contractor, and James S. Rear, of Palo Alto, owner of the division through which the road passes.

It is said that motorists attacked Madden, who was not seriously hurt, defied his watchmen and tossed the street barricades aside. A cable that had been placed across the Carlton road, chief point of contention, was knocked down and motor parties swarmed over one of the principal paved exits from the bridge.

Opening of the road to public traffic followed a conference between James S. Rear, head of the subdivision company, the board of supervisors and District Attorney Franklin Swart.

Swart is said to have told Rear to designate a roadway through his property, that motorists might reach the bridge, or he would obtain an injunction and open a highway himself. Following the conference, Rear declared the Carlton road as a public highway.

It is not anticipated that there will be any more trouble regarding the motorists being able to pass over the Dumbarton bridge.

TRAFFIC SQUAD NOT HIT BY NEW LAW

In the opinion of Franklin Swart, district attorney, the passage of the new San Mateo county government act, presented to the legislature by Assemblyman Harry L. Parkman of San Mateo, will not effect the present status of state motor police for the county.

Wide discussion has agitated police and other official circles since the publication of the provisions of the act, the discussions centering on Section 18, relating to a new arrangement for county patrol of highways under six officers at salaries of $1,800 per year each, and a chief at a salary of $2,100.

The last sentence of the much discussed section was pointed out by District Attorney Swart as a clue to the fact that the present state patrol of highways cannot be affected by passage of this act. The sentence follows: "All provisions of this paragraph are to apply to the office of county traffic officer and his deputies whenever said office of county traffic officer is created by law."

The office of county traffic officer cannot be created by law, since the present state patrol of highways is provided under a general state law with which the county regulations cannot legally interfere, it was pointed out.

SOUTH CITY TO BE HOST TO JUSTICES

South San Francisco will be host to the semi-annual convention of the Justices', Traffic and Peace Officers' Association, to be held on Saturday, April 30. The meeting will bring delegates from all coast counties, and as a result of a new movement in the organization, delegates from various other sections of the state, in an effort to make this association statewide.

Civic organizations of South San Francisco have combined to welcome the visiting officials. They will gather for luncheon at 12:30 on April 30, and the program for the afternoon will start at 2 o'clock with roll call and election of a permanent secretary.

The afternoon has been divided into three sections for discussion of the various topics of interest to the delegates. Women who accompany the delegates will be entertained by the South San Francisco Womans Club.

Ray Griffin, justice of the peace at Redwood City, is president of the organization. Justice Edward Farrell and Chief of Police Louis Beloni will represent South San Francisco.

TRUSTEES TAKE TURNS IN SERVING AS MAYOR

Following out a mutual agreement between Gordon Hess, Harry Totten and M. G. McClinton, when the trio were elected members of the Burlingame board of trustees three years ago, Mayor Hess has resigned as mayor, and Totten has been chosen in his place, to serve the remaining year of his incumbency. Through this shift all three of the trustees will have the honor of being Burlingame's chief executive. McClinton served first, then came Hess, and now Totten.

HAILS HIGHWAY BILLS PASSAGE GREAT VICTORY

Completion of the state highway system in its entirety as now laid out is assured on an equitable financial and administrative basis in the two companion highway measures of Senator Arthur H. Breed, which were passed by the State Senate last week, according to a statement issued by the California State Automobile Association.

The Automobile Association, with the Automobile Club of Southern California, representing a combined membership of 200,000 motorists, sponsored this legislation which is the product of conferences of representatives of the two motoring organizations with Senator Breed. The Senate's overwhelming vote for the gasoline tax and the fund allocation measure was hailed as the first step in an ultimate "good roads victory" that will again place California at the head of the list of good-roads-building states.

In the opinion of H. J. Brunnier, chairman of the Automobile Association highways committee, the Senate vote may be taken as an indication of the popular support which these measures will receive in the Assembly. The two bills were declared to be in line with policies recommended to the legislature by Governor C. C. Young.

"These two measures provide a permanent solution of California's highway problem," said Brunner, "which will establish a sound and equitable plan of financing and administration.

"The bill for an additional one cent gasoline tax provides that the funds thus raised shall be used exclusively for construction of state highways. The companion measure classifies state highways as primary and secondary and provides for equitable allocation of funds.

"Through the next twelve years this one cent will raise an average of $10,000,000 a year, insuring as rapid a rate of construction progress as can economically be maintained. That sum, together with federal aid, will complete the entire system within a twelve year period."

ASKS OBSERVANCE OF FOREST WEEK

Backing up Governor Young in his stand for conservation of the state's timber and watershed resources, the state legislature has adopted a resolution introduced by Senator J. M. Allen of Yreka, calling upon the people for a general observance of American Forest Week, April 24 to 30.

After emphasizing "the danger that comes from the neglect and abuse of our forest and watershed resources," the resolution, which was prepared at the instance of State Forester M. B. Pratt, says:

"Whereas, our esteemed Governor, C. C. Young, has recognized the prime importance of forest and watershed protection to California by accepting the chairmanship of the American Forest Week committee of California; therefore be it

"Resolved by the Senate, the Assembly occurring, in recognition of the dependence of the State of California upon the continuance of its forest and watershed resources, that all patriotic citizens be called upon to observe American Forest Week during April 24 to April 30, by appropriate exercises, to the end that our forest and watershed resources may be better conserved and renewed."

Governor Young, as chairman of the state committee, is being assisted by Charles Dunwoody, of the California Development Association, State Forester Pratt and other leading conservationists in mapping plans for an observance of the week, which comes shortly before the opening of the forest fire season.

PUBLIC SCHOOLS OF STATE TO CELEBRATE

Next week is Public Schools week, and will be generally observed in all sections of the state of California.

Reports received at state committee headquarters indicate approximately 600 meetings during the coming week.

In general, meetings are to be held in the auditoriums of schools, in accordance with the procedure established last year, when the services, because of the widespread interest that had come to attach to them, were made public observances.

The purposes of the week are to bring the public and parents into closer relation with school work, some of the subjects to be discussed being: What and how are our children to be taught, and why? Are the schools of today better or worse than those of yesterday? Are there "fads and frills" in the school curriculum, and if so, how did they get there? How much do our schools cost, and are they worth it?

Compared with Sayeda Amra, of Cairo, Egypt, our American bigamists are mere pikers. Amra married thirty-six wives in twelve years, and No. 36 has had him arrested for forging divorce certificates.

NOTICE INVITING SEALED PROPOSALS.

No. 33.

Pursuant to Statute and to Resolution of the Board of Trustees of the City of Daly City, directing this notice, said Board of Trustees hereby invites sealed proposals or bids for the following work in said City, to-wit:

SECTION I. That Niantic Avenue, Woodrow Street, San Diego Avenue, Miriam Street and Santa Barbara Avenue from the southerly line of Los Banos Avenue to the northely line of Knowles Avenue; San Diego Avenue from the northerly line of Los Olivos Avenue to a line drawn across said San Diego Avenue which is parallel with and distant one hundred (100) feet northerly at right angles from the northerly line of Los Olivos Avenue; Santa Barbara Avenue from the northerly line of Los Olivos Avenue to the southerly line of Hillcrest Avenue be improved as follows, to-wit:

(a) By grading all of said streets for the full width thereof and for the lengths above described,

(b) By constructing on both sides of said hereinbefore mentioned and described streets and avenues a combined steel armored hydraulic cement concrete curb and gutter and hydraulic cement concrete sidewalks on either side of said streets and avenues of the character, sizes, dimensions, materials and in the locations as shown on the plans and specifications hereinafter referred to herein.

(c) By constructing for the full length and the full width of hereinbefore mentioned streets and avenues between the gutters to be constructed thereon as hereinbefore mentioned a pavement consisting of an asphaltic concrete wearing surface one and one-half (1½) inches in thickness laid upon a hydraulic cement concrete base four (4) inches in thickness.

SECTION II. That the portion of Knowles Avenue for a width lying between a line which is parallel with and distant twenty-five (25) feet northerly at right angles from the southerly line of said Knowles Avenue and the northerly line of said Knowles Avenue and for the length running from the easterly line of Lot 83, Block A, Mission Street Tract extended southerly, to the easterly line of Lot 5, Block A, extended southerly, including all street and avenue intersections and terminations and portions thereof within said lines be improved as follows, to-wit:

(a) By grading said portion for the full width and length thereof.

(b) By constructing on the northerly side thereof a combined steel armored hydraulic cement concrete curb and gutter and hydraulic cement concrete sidewalk of the character, sizes, dimensions, materials and in the locations as shown on plans and specifications hereinafter referred to herein.

(c) By constructing for the full length of said street and for a width between the gutter to be constructed thereon as hereinbefore mentioned and the northerly edge of the at present existing asphaltic concrete pavement on the southerly side of Knowles Avenue, an asphaltic concrete pavement consisting of an asphaltic concrete wearing surface one and one-half (1½) inches in thickness laid upon a hydraulic cement concrete foundation four (4) inches in thickness, excepting therefrom however any such asphaltic concrete pavement on that certain portion of Knowles Avenue described as follows: a strip of street area five (5) feet in width immediately adjoining and on the northerly side of a line which is parallel and distant twenty-five (25) feet northerly at right angles from the southerly line of said Knowles Avenue and extending from the westerly line of Lot 18, Block A, Mission Street Tract, extended southerly, to the easterly line of Lot 5, Block A, Mission Street Tract extended southerly, said strip of street area shall be improved by constructing thereon for the full width and length thereof a hydraulic cement concrete pavement five and one-half (5½) inches in thickness;

SECTION III. That a five (5) foot strip of a portion of Knowles Avenue extending from the westerly line of Lot 18, Block A, Mission Street Tract extended southerly, to the easterly line of Lot 5, Block A, Mission Street Tract extended southerly, which five (5) foot strip is southerly from and adjoins a line which is parallel with and distant twenty-five (25) feet northerly at right angles from the southerly line of Knowles Avenue and which strip is at present paved with vitrified brick pavement be improved by removing the vitrified brick pavement and sand cushion from said strip and by repaving said strip for the full length and width above mentioned with a hydraulic cement concrete pavement five and one-half (5½) inches in thickness.

SECTION IV. That Niantic Avenue from the northerly line of Los Olivos Avenue to a line drawn across Niantic Avenue parallel with and distant one hundred (100) feet northerly at right angles from the northerly line of Los Olivos avenue be improved by grading said street for the full width thereof and by constructing on both sides thereof a combined steel armored hydraulic cement concrete curb and gutter and by constructing on the easterly side of said street a hydraulic cement concrete sidewalk, and also by constructing for the full length and width of said street between the gutters to be constructed thereon as hereinbefore mentioned a pavement consisting of an asphaltic concrete wearing surface one and one-half (1½) inches in thickness laid upon a hydraulic cement concrete foundation four (4) inches in thickness, all of the above work to be of the character, sizes, dimensions, materials and in the locations as shown on the plans and specifications hereinafter referred to herein.

SECTION V. That the easterly side of San Diego Avenue from the southerly line of Los Olivos Avenue to the westerly extension of the southerly line of Lot 14, Block B, Mission Street Tract be graded for and a combined steel armored hydraulic cement concrete curb and gutter and a hydraulic cement concrete sidewalk be constructed thereon of the character, sizes, dimensions, materials and in the locations as shown on the plans and specifications hereinafter referred to herein.

SECTION VI. That the intersection of Niantic Avenue and Knowles Avenue be improved by the construction therein of forty-four (44) feet of twelve (12) inch diameter vitrified saltglazed ironstone pipe storm drain with one (1) red burnt brick storm water catch basin capped with cast iron frame and grating, all to be of the character, sizes, dimensions, materials and in the locations as all are more particularly shown on the plans and specifications hereinafter referred to herein.

SECTION VII. That that portion of North Parkview Avenue and South Parkview Avenue in front of the City Park commonly called Vista Grande Park, which portion is more particularly shown on a sheet of the plans and specifications hereinafter herein referred to, which sheet is marked sheet 3 of 3 sheets, be improved by grading for and the construction of 209.58 lineal feet of combined steel armored hydraulic cement concrete curb and gutter and by constructing between said proposed gutter and the edge of the now existing asphaltic concrete pavement, an asphaltic concrete pavement consisting of an asphaltic concrete wearing surface one and one-half (1½) inches in thickness laid upon a hydraulic cement concrete foundation four (4) inches in thickness, all of the above work shall be of the character, sizes, dimensions, materials and in the locations as shown on the plans and specifications hereinafter referred to herein.

SECTION VIII. And the Board of Trustees of the City of Daly City does hereby determine and declare that the foregoing described work and improvements are of more than local or ordinary public benefit and will affect and benefit the lands and district hereinafter mentioned and described, which said district is hereby declared to be the district benefited by said work and improvement; that therefore the entire cost and expenses of said work and improvement shall be and are hereby made chargeable against and shall be assessed upon said lands and district, which district is within the limits of the City of Daly City, County of San Mateo, State of California, and the exterior boundary of said district is hereby described as follows:

BEGINNING at a point where the easterly right of way line of the Southern Pacific Company's Right of Way, Valencia Street Branch, is intersected by the line dividing San Francisco County and San Mateo County, running thence east along said County Line to a point where the same is intersected by the southwesterly line of the subdivision called Mission St. Extension Homestead Association; thence southeasterly along said southwesterly line of said subdivision to its intersection with the center line of Mission Circle; thence northesterly along the center line of Mission Circle to the center line of Bepler Street; thence southeasterly along the center line of Bepler Street to the center line of San Jose Avenue; thence southwesterly along the center line of San Jose Avenue and continuing southwesterly along the center line of Mission Street to the center line of Citrus Avenue; thence westerly along the center line of Citrus Avenue to the easterly line of the hereinbefore mentioned right of way of the Southern Pacific Company's Valencia Street Branch; thence northerly following along said easterly right of way line to the point of beginning; excepting however from said assessment district all streets, avenues, ways, courts, public rights of way and other public property included within said assessment district.

SECTION IX. All of the hereinbefore mentioned and described work and improvements shall be constructed at the places in the positions, locations, of the dimensions, sizes and materials and in the manner as shown and described on the plans and specifications therefor heretofore adopted by the Board of Trustees of said City of Daly City on the 28th day of February, 1927, and now on file in the office of the Clerk of said City, to which plans and specifications reference is hereby made for an accurate and complete detailed description and location of said work and improvement and the same are made a part hereof.

SECTION X. There is hereby excepted from the above mentioned work any thereof that is already done to the line and grade as shown on the plans and specifications herein mentioned.

SECTION XI. And it is further resolved by the Board of Trustees of the City of Daly City and said Board does hereby adopt and establish as the official grades for the work and improvements herein mentioned, the grades and elevations shown and set forth on the plans and specifications hereinbefore mentioned, which plans and specifications were heretofore adopted by said Board of Trustees on the 28th day of February, 1927, and to which reference is made for a description of the grades at which said work is to be done and made. All such grades and elevations shown on the plans herein and established by this Resolution of Intention are in feet and decimals thereof above the City base established by the Board of Trustees of the City of Daly City.

SECTION XII. Whenever the phrase "Mission Street Tract" is herein used it shall be understood to mean that certain map entitled "Map of Mission Street Tract," filed in the office of the Recorder of the County of San Mateo, State of California, on the 21st day of January, 1907, in Book "D" of Maps at page 50, Records of San Mateo County.

Whenever the phrase "Mission St. Extension Homestead Association," is herein used it shall be understood to mean that certain map entitled "Map of Mission St. Extension Homestead Association," filed in the office of the Recorder of the County of San Mateo, State of California, on the 3rd day of September, 1872, in Book "D" of Maps at page 49, Records of San Mateo County.

Reference is hereby made to the above records and the same are made a part of this Resolution of Intention.

SECTION XIII. Notice is hereby given that serial bonds to represent unpaid assessments, and bear interest at the rate of seven (7) per cent per annum will be issued hereunder in the manner provided by the Improvement Bond Act of 1915, as amended, the last installment of which bonds shall mature nine years from the second day of July next succeeding ten months from their date.

SECTION XIV. Except as hereinabove otherwise provided for the issuance of serial bonds, all of the above proposed work shall be done in pursuance of the Improvement Act of 1911, as amended.

Reference is hereby made to Resolution of Intention No. 33 of said Board of Trustees declaring its intention to order said work to be done, and for further particulars, which Resolution of Intention is on file in the office of the Clerk of said City.

Reference is hereby made to said sepcifications for said work, also posted.

All proposals or bids shall be accompanied by a check payable to the City of Daly City, certified by a responsible bank for an amount which shall not be less than ten per cent of the aggregate of the proposal, or by a bond for the said amount and so payable, signed by the bidder and two sureties, who shall justify before any officer competent to administer an oath, in double the said amount and over and above all statutory exemptions.

Said sealed proposals or bids shall be delivered to the Clerk of the City Council of said City, on or before Monday, the 9th day of May, 1927, at the hour of eight o'clock P. M., said time being not less than ten days from the time of the first publication and posting of this notice. Bids will be opened on said day and hour.

Dated: April 19, 1927.

B. C. ROSS,
City Clerk.

First publication in the Daly City Record, April 22, 1927.

CIRCUS COMING TO SAN MATEO COUNTY

The Al G. Barnes Circus is coming to San Mateo, Monday, May 2, and Palo Alto, Tuesday, May 3.

Advertising agents representing Al G. Barnes Circus have been posting pictorial circus bills in this vicinity announcing the coming of this excellent show, and advertisements will be found in our columns this week. The management of the Al G. Barnes Circus annuonces the following big features this year:

The all new spectacle entitled "Aladdin and the Parade of Gold," in which approximately 1,000 people take part, including the Chinese beauty, Lola Lee Chong; the Chinese giant, Liu Yu-Ching, the biggest man on earth; Klinkerts, equestrian midgets, fourteen tiny horsemen from Bavaria; San Marcus, the $16,000 equine star; the zebra round-up, with the largest herd in captivity in America; and many other novel features and performances given by American and foreign artists, and animals from every part of the world.

Two performances are given daily, the afternoon starting at 2 o'clock and the night performance at 8 o'clock. The doors are open one hour previous for the inspection of the largest traveling zoo in America, and for the children to see the Chinese exhibit in which Liu Yu-Ching and his suite hold a reception.

The Al G. Barnes Circus has always enjoyed an excellent reputation, giving universal satisfaction to all their patrons.

TELEPHONES FOR POLICE

All the police officers in the city of Los Angeles have been ordered either to have telephones installed in their homes or to furnish telephone numbers at which they may be reached, day or night. The order states that officers with their present salaries can afford telephone service, and it is a desire of the department to be able to keep in touch with such officers at all times.

CHILDHOOD THEME MAY DAY SERVICE

A triple celebration symbolizing various phases of childhood is being planned for the approaching May Day, with the participation centering in a childrens' musical program. It happens that May Day is not only National Child Health Day, but the opening day of National Music Week, and the closing day of Children's week. It was with these observances in mind that the American Child Health Association asked the National Music Week committee to collaborate with it in preparing this musical program, "The Message of May."

The result of that collaboration is in the form of a brief musical program or service suitable not only for Sunday schools, but for secular groups of young people. It is therefore being recommended for use not only by the Federal Council of Churches, but by the various national organizations making contact with young people, such as the Y. M. C. A., Girl Scouts, Camp Fire Girls, Girl Reserves, and by the local child health committees in the various cities. One of the organizations interested in the program is the International Council for Religious Education, which is sponsoring Children's Week. That Council's state chairmen on children's work are acquainting their local groups with "The Message of May." In this way the presentations of the program will cover the fields of music, health and religion, as applied to childhood.

America's composers of church music are to be given special recognition on the opening day of National Music Week, May 1.

PRINTERS CELEBRATE SATURDAY, MAY 14

The Printers' Day celebration on Saturday evening, May 14, promises to be the most largely attended of any social function to be held at the Civic Auditorium, San Francisco, next month. In fact, the interest in this affair is becoming so acute, not only of those residents of San Francisco, but of many from other sections of the northern part of the state, that Chairman Albert Springer, Sr., is confidently looking forward to as large a crowd as that of the South of Market Boys' Club next Saturday.

This memorable event is being held in commemoration of the fortieth anniversary of the formation of the Union Printers' Mutual Aid Society, but although being sponsored and financed by that organization, the arrangements are being made by a large committee of representatives from the various unions affiliated with the Allied Printing Trades Council.

The program, among other features, is to include a grand entertainment and ball. Already offers of assistance in providing the best talent available have come from the management of several of the most prominent theatres and movie houses. Several amateur vaudeville artists favorably known about the bay section have also volunteered their services. Phil Sapiro's well known municipal band of forty pieces is to furnish the music for the dancing.

People in the printing industry, with their friends, from various parts of the state are to attend in large numbers, as also are hundreds affiliated with both the Labor and Building Trades Councils. Invitations to attend are to be sent to the general membership of all these organizations, as well as to Governor Young, Mayor Rolph and other state and municipal officials.

LEGION ENDORSES MILITARY TRAINING

Endorsement of the Citizens Military Training Camps scheduled from June 26 to July 25 has been given by the American Legion's state committee on national defense.

In this connection, Major General Joseph E. Kuhn, of San Diego, chairman of the veterans' commission, has issued the following statement: "It is right and essential that the United States should look well to its national defense. Military instructions recently coming out of Moscow show an extension to the high schools in Russia beginning in February.

"University students have received such training in regular program, and now the boys between the ages of 12 and 16 will be given theoretical instruction and drill in military science, including rifle practice, areonautics, tank attacks and chemical warfare. They will spend three months in summer camps for field drill," Kuhn declares.

"This is only one of the many measures the Soviet government is taking to inculcate the spirit of vigilance in the population and bring about preparedness for every emergency. The Communist program of world revolution should be a sufficient warning to America to maintain our national defense."

Next Monday and Tuesday, April 25 and 26, the State Theatre presents Norma Talmadge and Ronald Colman in "Kiki," the story of a French girl who made good in spite of many pitfalls and obstacles.

China's antipathy to Americans is said to have been aggravated by the introduction of American chop suey.

ADVISE VETERANS TO REINSTATE INSURANCE

Every effort is being made by officials of the American Legion Post to encourage veterans to make appliion at once for reinstatement or conversion of their government insurance. The last day on which insurance can be taken out by war veterans is July 2, 1927. Conyress has ruled that it is absolutely the final date, and Legion officials throughout California are urging the veterans to take advantage of the low rates offered under government insurance.

"The provisions for reinstatement are lenient, the terms of the policies so liberal and the premiums themselves so low," declares State Adjutant James K. Fisk of the Legion, "as to bring some one of the seven converted polieies within reach of every veteran. We are concerned in seeing that every man or woman entitled to this insurance be advised of his or her rights in connection with it before it is too late. It is unnecessary to dwell upon the merits of life insurance, and the benefits which would come to all veterans and their dependents by taking advantage of the liberal provisions made by the government in the matter of insurance. We urge all veterans, whether Legion members or not, to get in touch with their local Post, where the required forms may be secured and assistance freely offered," Fsik states.

ENTER PROTEST

A protest against the proposal of President Diaz to make a treaty with the United States, giving the United States a virtual protectorate over Nicaragua, was received by the State Department through the agency of T. Seydel Vaca, agent in Washington of Juan Sacasa, leader of the Liberal forces in Nicaragua.

The gist of this protest was that such an agreemetn would destroy the sovereignty of Nicaragua and make it virtually dependent on the United States. It was also stated that the proposed loan of $20,000,000 by the American bankers on terms similar to those offered or arranged for in the past fifteen years would be only a means to place the Nicaraguan people under the yoke of banker domination for many years to come. The protest is described by some as a plea for independence.

GREAT POWER ERA VISIONED IN INDUSTRY

Colossal machines of the superpower turbine class, linked up with miles of cables, pipes, tunnels and steel rails, are to revolutionize the meat packing, steel and other great industries during the next few decades.

Commenting on industrial progress in the United States, W. Sykes, consulting engineer of the Inland Steel Company, says:

"By substituting machines of the superpower age for manual operations a thirty-six per cent increase in production per man has been accomplished in the last ten years, despite elimination of the 12-hour day.

"With each great improvement in power development and distribution there ras come an increase in production of the steel industry, improvement of working conditions and standard of living of its 470,000 employees. These have resulted in cost and selling price reductions."

Ten years ago, prediction was made that the electrical industry in America soon would require $1,000,000 a day of new capital—and Wall Street was shocked.

Last year it absorbed $2,000,000 daily and no one was shocked. From the viewpoint of an electrical power producer, W. W. Freeman, President of the Union Gas and Electric Company, Cincinnati, humanity is just peeping over the mountain tops, catching the first glimpse of dawn in a new age of which the great central power plants are the heart.

GROWTH IN STOCKHOLDERS

Ten years ago the American Telephone and Telegraph Company had only 74,451 stockholders. Today it has over 400,000. The decade from 1917 to 1927 has seen a tremendous increase in public ownership of its public utilities. A decade ago, according to the best available figures, there were only 500,000 stockholders in the leading enterprises of the country, whereas today the American Telephone Company alone possesses almost four-fifths that number.

The Bell Telephone Company of Pennsylvania expects to install 58,000 telephones in the city of Philadelphia during the present year, or an average of 200 telephones daily. Allowing for disconnections this would mean a net gain of 16,000 telephones.

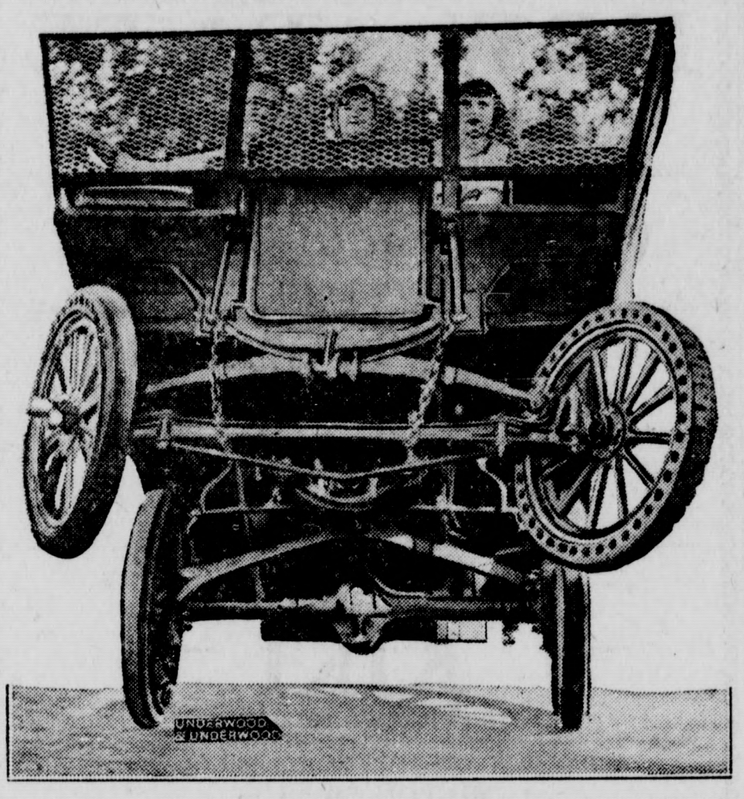
MISSOURI MULE FAVORED FOR THRILLS



For those who crave excitement and thrill we would recommend a trip to Oaks park, Portland, Ore., there to experience a ride on the Missouri mule (pictured above). The Missouri mule to all appearance looks like a well-mannered flivver, but looks are deceiving—at least in this case—for the flivver is possessed of diabolic tendencies—and when in use may buck, rear and stall like a mule.

BIG IMPORTANCE OF LUBRICATION

Many Motorists Fail to See Why Frequent Change of Oil Is Vital.

In spite of the fact that manufacturers, garage men and dealers constantly stress the importance of frequent oil changes in engine lubrication, many motorists fail to see why this changing is so vital.

The introduction of improved lubrication systems, oil filters and devices to lessen oil dilution in the crankcase has done much to cut down lubrication troubles, but the subject of oil changing still demands the careful attention of the motorist.

What Happens to Unchanged Oil.

What happens when you fail to change oil? In the first place, heat produces a chemical change in oil which causes it to lose its lubricating qualities. Gasoline may become mixed with the oil, lowering its efficiency. When there is no oil filter, particles of metal from the wearing surfaces and a certain amount of dirt and rust which accumulate in the crankcase oil may be forced to the engine operating parts. Unless all the oil is drained out of the crankcase, foreign matter will remain there. It is not sufficient to add only enough oil to keep the proper level.

A new engine requires more frequent oil changes than an engine which is "broken in," because new bearing surfaces throw off a greater number of metal particles. After the first 500 miles of driving, it is advisable to change the oil in the engine. Repeat this operation every 2,500 miles in warm weather, and every 1,000 miles in cold weather.

What Kind of Oil to Use.

Fortunately for the motorist, oil service is today so highly developed that it is possible to get disinterested advice from filling-station service men, oil dealers and garage men as to the best type of oil to use for your engine. In addition to this, manufacturers issue booklets of instruction with new cars, telling just what sort of oil to use for best results.

Remember that, at speeds of 40 miles an hour or greater, oil consumption by the motor is considerably higher that at lower speeds. With ordinary driving, the motor may consume one quart of oil every 125 miles of travel, but this amount becomes greater as speed increases.

Best Time to Overhaul Auto and Refinish Body

Fastidious car owners who want to begin the spring months with an automobile that is mechanically perfect and spick-and-span in appearance should take advantage of the present season to have their cars overhauled and refinished.

Repair and refinishing establishments are less rushed at this season than at any other time of year. Cars put up for either or both types of work now will be given attention that cannot be commanded when the demand for speed becomes great.

At no other time can an owner so well afford to be without his car.

Lining Up Front Wheels

Many car owners fail to make headway when lining up the front wheels because they fail to true up the wheels and tires separately. The front wheels may toe in the proper amount, but the rims may not run true, thus throwing the tires out of line. This can be determined by revolving the wheels separately and noting how true they turn. Any variation may be due to the wheels being too loose on the axles or to the rims being screwed to the wheels unevenly.

Motorcycle Coupe Popular in Paris

The inside drive motorcycle coupe is on the streets of Paris.

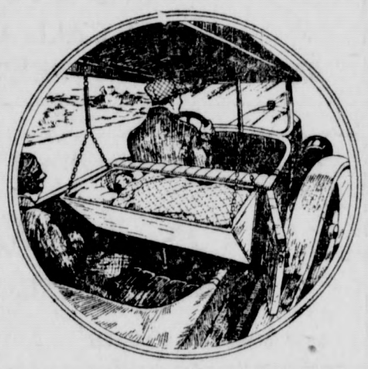
It looks like a normal motorcycle with a one-man body, top, windshield, curtains and all, placed well forward so the steering can be done comfortably with the long handle-bars.

A small radiator in front, over the steering wheel, makes the vehicle look like a small automobile.

The motor is under the body with the starting crank at the rear. A small third wheel to the right rear, supports the car at rest.

Baby Carrier for Auto Safe and Comfortable

When riding in the rear seat of a car it is quite difficult to hold a baby comfortably, but by providing a carrier the trouble will be eliminated. The carrier shown in the drawing consists of a canvas bag, the open top of which is held rigid by a wood or metal frame. Lengths of brass or galvanized chain and two coil springs, to serve as



Simple Baby Carrier Hung Behind Front Seat Is Safe and Comfortable.

shock absorbers, are attached as indicated, and the baby will be safe and comfortable. To prevent the crib from lurching it should be fastened to the back of the front seat near the bottom by means of a short coil spring.—Carlton Groat, The Dalles, Ore., in Popular Mechanics Magazine.

Numbering Gear Shift to Help in Handling Lever

In teaching his wife to drive a motorist found that she was having great difficulty in remembering the several gear-shift positions, and as a result was slowing up her shifting considerably, due to having to stop to think which lever position was which. He hit upon the idea of employing some small metal numbers, such as might be used for small signs and the like. Procuring a "1," "2," "3" and an "R," he nailed them to the footboard in proper position to indicate the way the lever had to be shifted to effect any given speed change. The idea worked to advantage, and the beginner had only to glance down at the numbers to know exactly which way to carry the lever, eliminating all uncertainty.

AUTOMOBILE NOTES

See that the generator charges sufficient amperage at all times to avoid battery damage.

* * *

Motorists have paid liberally and without complaint for good roads. The "detour" still persists.

* * *

Keep the foot flat on the floor board, unless actually shifting gears or slowing quickly to a stop.

* * *

Blow your auto horn at the railroad crossing so that the limited train will know you're around and won't run the risk of being knocked from the right-of-way.

* * *

CALIFORNIA NEWS BRIEFS

A rat disorganized a parade at Santa Rosa recently, sent scores of women screaming into hysterics while strong men shouted in alarm. The parade was the culmination of Be Kind to Animals Week. Hundreds of boys and girls, surrounded by pet dogs, cats, goats, monkeys and such, comprised a six blocks procession. On the sides of the streets were gathered parents and onlookers. Charles Friedman, 9, was one of the proud marchers. His fondness for animals was displayed in four or five large, white-spotted Italian rats. They were in his pockets and clambered on his shoulders. At one of the busiest downtown streets, one of the rats, very tame and playful, leaped to the shoulders of a woman. She promptly went into hysterics, followed by every woman in sight. A wild scramble for altitude took place and the normal peaceful scene took on the appearance of a full blown riot. Charles is still looking for his pet.

More than 500,000,000 pounds of milk, or its equivalent in the form of manufactured dairy products, was required to supply the needs of Americans in 1926, in excess of this country's production, according to figures disclosed by the Federal Bureau of Agricultural Economics. In striking contrast to this adverse trade balance in the dairy industry, California total production increased and her per capita consumption likewise showed a gain for the year, it was revealed in a review of the statistics prepared for D. M. Dorman, president of the Crescent Creamery company. Every man, woman and child in the state last year consumed twenty-three and one-half gallons of milk, compared with twenty-two gallons in 1925, or a total gain of 7,000,000 gallons for the state's population. Total consumption in California in 1926 was 108,362,554 gallons, as against 101,705,518 for the preceding year.

Charles M. Schwab, head of the Bethlehem Steel Company, who is at Del Monte, declared that California's future depended on intelligent conservation of the state's natural resources. "Protect and replant your fire devastated forests," said Schwab. "Exercise every precaution in the preservation of your valuable watersheds. Conserve and put to use the flood waters which at present do thousands of dollars damage every year." Schwab said he found California prosperous and felt that the Florida boom would redound to the benefit of this state, because everyone who joined in the Florida rush would want to visit California.

Showing building activity of more than $1,000,000 in excess of the figure for the same period in 1926, Los Angeles building permits for the first eight days of April soared to $3,171,084, as compared with $2,062,752 for April to date in 1926. A total of 1076 permits have been issued thus far this month, as compared with 868 in 1926. Not only was a sharp rise noted over the April period of last year, but the total for the first eight days this month is almost $1,000,000 in excess of the corresponding eight days of March, 1927. During the March period, 976 permits were issued with a total valuation of $2,252,227.

Although lettuce shipments have recently been low, other products are going out in car lots from Brawley. Cabbage is moving; carrots, grapefruit, greens and peas made up the bulk of the shipments. Cattle are beginning to show an increase, and a car of so-called "bootleg pigs," gathered from various valley points recently moved to Los Angeles. This is in marked contrast to the time when hogs were a bulk in outgoing shipments, while cars of green stuffs were scarcely known.

Warning that continued destruction of the state's watershed coverage will cut down the water supply so badly needed to promote irrigation projects, Governor Young, as chairman of the state committee, addressed an appeal to all agricultural associations in California to assist in spreading the gospel of fire prevention and reforestation during American Forest Week, April 24 to 30.

Redlands grows steadily judging from the growth of the postal receipts. For the first three months of this year the receipts at the postoffice here were $17,560, as compared with $16,462 for the same period last year. Every month so far this year has shown a gain, such a gain as would indicate a steady increase in population.

Southern Pacific trains will travel slowly when they go through Delano if the railroad obeys an ordinance ordered drafted by the city attorney by unanimous vote of the city trustees. The proposed ordinance would cut the speed of the train to eight miles an hour as a safeguard to children.

Quite an acreage of watermelons is being planted this year at Ballico, Merced county, considering that peaches and grapes and alfalfa are the staple crops for this vicinity. There is no question about being able to produce good melons, and early ones at that, but the great problem has been to be able to market them to advantage.

Voters of Modesto school district went to the polls April 12, to cast ballots for city governing officers, for three members of the board of education and on the proposition of $330,000 for school improvements.

Dedication of the new Masonic Temple, at Yreka, Siskiyou county, the new home of Howard Lodge No. 37, of that place, was conducted recently.

One of the largest poultry plants in Tulare county is being developed by the Woodside Poultry association at Visalia. It is planned to care for 10,000 laying hens.

The new six-story structure for the York Rite Masons of Long Beach, is under construction and rising rapidly. The temple will cover all of the 125x150 foot lot. It is of modified Doric design.

Navel oranges have been going out steadily from all the packing plants at Pomona, over 200 cars having been sent east up to a recent date from the Pomona valley. Fifteen cars of lemons have been shipped.

An important industry is returning to Kings county in the center of the San Joaquin valley fruit belt, in the packing of raisins and other fruits. For several years there has been no packing of raisins in this county.

Construction of the new Owensmouth Christian Science church is well under way. The building will be of stucco, and 30x60 feet in dimension. It will be ready for occupancy within the next thirty days, it is announced.

An agreement between the state board of forestry and the Eddy Tree Breeding Institute of Placerville was reached whereby the Eddy organization will establish an experimental station at the state nursery in Davis.

That dairying is on the increase in the Turlock Irrigation district is evidenced by the large number of thoroughbred dairy cattle being shipped in, over $9,000 worth having arrived within the past ten days. Through the efforts of the Turlock chamber of commerce many of the Turlock farmers are planting alfalfa this season, with the view of stabilizing production.

Is the Valencia orange the crop to which the soil and climate of Orange county are most ideally suited, or will some other product of the soil creep in and crowd it from its golden throne? Can the Avocado be seriously considered as a candidate for future orchard supremacy? These questions are being asked in all seriousness by some well-known growers. Time will answer them.

Bids have been called for on the proposed new creamery to be erected in Visalia by the Knudson Laboratories, Inc., of Los Angeles. This building will be erected on a site on Goshen avenue along the Southern Pacific tracks. It will be thoroughly modern in every detail, constructed of concrete and steel. About $40,000 or $50,000 is expected to be expended on the first unit of the local plant.

Electors of the Vacaville Union High school district voted Wednesday April 20, on the question of issuing $100,000 bonds to finance school improvements at Vacaville, Solano county. The issue was divided into two proposals, one providing $25,000 for purchase and erection of equipment for a gymnasium, and another for $75,000 to finance alterations and additions to the present school building.

San Diego will have approximately $1,221,900 expended for additional telephone facilities in its exchange during 1927, according to officials of the Pacific Telephone and Telegraph company. It is estimated that 600,500 will be expended on additional local central office equipment, $46,000 for long distance central office equipment, $355,500 for outside plant equipment, and $319,900 for equipment to be installed in subscriber's homes and offices.

The city of Sonora having filed a complaint with the railroad commission alleging that the rates for electric light and power charged by that utility are excessive, the railroad commission has ordered the company to place in effect on and after April 5, 1927, reduced rates that will reduce the net return of the company to approximately 8 per cent per annum. The commission found that the company was earning in excess of 18 per cent per annum under the old rates.

Telephone service was inaugurated in Los Angeles in 1880. Of the seven original subscribers, four still appear in the telephone directory and are now large companies. The original directory was a small card. There are listings of 316,500 telephone in the Los Angeles Exchange section of the March 1927, directory. A room in the Baker block on Main street was the first home of the infant telephone company. Just thirty years ago the list of subscribers had grown to 3168.

George W. Foulke, 85 years of age, and still hale and hearty, is Elk Grove's oldest pioneer resident. He arrived at Elk Grove in September, 1853, as a boy after journeying across the plains in a covered wagon with his parents. Foulke can recall how Elk Grove received its name from the first settlers because of the large number of elk seen roving around in this vicinity. Only one other person in the same party of immigrants is still living. She is Mrs. A. C. Freeman of San Francisco.

W. E. Landon, San Dimas horticultural inspector, was recently summoned to visit the orange grove of C. E. Plummer, to discover the cause of the dying of a number of the trees. He investigated carefully and found nothing that would seem to be fatal to citrus, so he sat down to study the matter and as he lighted a cigarette the dead tree under which he sat burst into flames. It was discovered that a gas main runs along the edge of the grove, and it seemed probable that a leak in it accounted not only for Mr. Landon's experience, but also for the injury to the grove.

Daddy's Evening Fairy Tale

BY MARY GRAHAM BONNER

COPYRIGHT BY WESTERN NEWSPAPER UNION

SEEING SATURN

It was getting dark and the stars were coming out one by one. Pretty soon the moon appeared.

Douglas and Dorothy were taking a walk quite far uptown in the city by a great college when Uncle John, who was with them, asked them why they were so quiet.

"I was thinking," said Douglas, "that we could never call the stars and the moon wonders of the city, for they are wonders that people all over the world have—no matter where they live."

"Well, I'm glad," said Dorothy, "that people in other places have some nice things, too—for it seems as if we certainly had our share."

"It's true," said Uncle John, "that all over the world people can see the stars and the moon which have come out in the sky.

"But I don't believe you ever saw the stars and moon just as you are going to see them soon."

Douglas and Dorothy followed Uncle John into one of the big buildings and then up into a dome, where they saw

Then Douglas Looked Through.

a queer looking object——quite long—which a man was moving about, and then looking through one end of it.

"I've brought the children to see Saturn," said Uncle John.

"Good," answered the man. "They can see Saturn tonight very clearly through the telescope."

So the queer-looking object was a telescope, but who was Saturn?

They didn't know the names of the stars and planets and they didn't know that Saturn was one of the very far-away planets with a ring around it.

They looked so puzzled that the man laughed. "I do believe they think they are going to see a person," he said.

"Aren't we?" asked the children in unison.

"You're going to look at the stars and the moon and you'll see them very much nearer and also very much larger than you ever have before."

First Dorothy and then Douglas looked through the little end of the telescope.

There was the moon! Oh, how big it was and so very, very bright.

Dorothy could hardly look at it, for it was so dazzling. And then the man moved the telescope so it was on Saturn and they saw the planet with the ring around it.

"To think," said Douglas, "that the city even has a way all its own of looking at the stars."

"And this is another one of those marvelous inventions that Douglas always wishes he could invent," said Dorothy.

"Yes," said Douglas slowly, "I wish some day I could think of a wonder like this—a telescope which makes everything look so much larger and more interesting and so people could see more of the far-away moon nad stars with the help I gave them."

Hard Job Steering

Five-year-old Bobby was given a new bobsled for his birthday with which he coasted down a hill some distance across the field. Later he was told he might have a little sister as a playmate some time in the near future and was greatly pleased at the prospect of having some one to coast down hill with on the new sled.

The new arrival, however, proved to be twins—a boy and a girl. Bobby surveyed the squirming red faces in silence, then he said, his mind on the coaster:

"Some job, holding onto them and steering, too!"

Settle Down—Not Up

Grocer—So your folks are moving out West! And you're going to settle out there, I suppose? Eh?

Boy—Why—er—no. I guess we'll have things charged, same as here—The Progressive Grocer.

'Ark, 'Ark!

Teacher—Now, we all know about Noah's ark. Do you know of any other ark?

Tommy—Yes, miss, the one the 'erald hangels sing.—Tit-Bits, London.

A Difficult Question

Tommy—Is a tin horn made out of tin?

"Yes, my son."

Tommy—Then why isn't a fog horn made out of fog?

Not Quite Fair

Caller—Well, Bobby, how do you like your new baby sister?

Bobby—Oh, all right, only I was expecting a radio.

Why He Succeeded

Honored politically and professionally, during his lifetime, Dr. R. V. Pierce, whose picture appears here, made a success few have equalled. His pure herbal remedies which have stood the test for many years are still among the "best sellers." Dr. Pierce's Golden Medical Discovery is a stomach alterative which makes the blood richer. It clears the skin, beautifies it, pimples and eruptions vanish quickly. This Discovery of Dr. Pierce's puts you in fine condition. All dealers have it in liquid or tablets.

Send 10 cents for trial pkg. of tablets to Dr. Pierce, Buffalo, N. Y., and write for free advice.

Diving Dog

Doris Pigeon of North Adams, Mass., has a "diving dog." Brownie, as he is named because of his color, likes to go swimming better than anything else. Doris says that one of his best stunts is to stand on his hind legs and dive into the water. Brownie does all the other "dog" tricks, such as "praying," sitting up, and speaking for his dinner, but Doris and her friends think that his "diving" stunt is entirely different from anything else that dogs usually do.—Washington Star.

if your horse has a cough or cold or has been exposed to disease give it Spohn's. Use Spohn's to keep your horses working full time. For distemper, influenza, colds, coughs, pink eye, catarrhal fever and all diseases affecting the nose, throat and lungs give—

Puts An End to Bunion Pains

No Need to Suffer Another Day Those Agonizing Torturing Pains.

There is one simple yet inexpensive way to reduce inflamed, swollen toe joints and get them down to normal and that is to apply Moone's Emerald Oil night and morning.

Ask your druggist or any first class druggist for an original two-ounce bottle of Moone's Emerald Oil (full strength) and refuse to accept anything in its place. It is such a highly concentrated preparation that two ounces lasts a long time and furthermore if this wonderful discovery does not give you complete satisfaction you can have your money refunded.

Special note: People who want to reduce swollen or varicose veins should get a bottle of Emerald Oil at once. Applied night and morning as directed they will quickly notice an improvement which will continue until the veins and bunches are reduced to normal

NICARAGUAN QUESTION

"In order to take to our minister, Mr. Eberhardt, and to Admiral Latimer, certain views of the administration which cannot conveniently be taken up by correspondence, and in order to get information from them as to the entire situation in that country to bring back for the use of this government, which they cannot very well give to us through correspondence," the Honorable Henry L. Stimson of New York, former Secretary of War, has consented to make a trip to Nicaragua as a representative of President Coolidge, it was stated recently by Secretary Kellogg.

In the meantime American marines are stationed in Nicaragua and have declared certain portions of that country neutral territory. Since their arrival in that country and the sale of arms by the United States to the Conservatives under Diaz, the Liberals under Sacasa have suffered several defeats at the hands of the Conservatives. Before that time the Liberals had been victorious in most of the engagements.

EDUCATIONAL ACTIVITIES

Research on educational methods that is carried on in the classroom where the process of education is actually taking place, where the conditions are normal, and where all the agencies concerned are functioning as they usually do, is the research that promises the largest returns in education, it has just been stated by the Bureau of Education.

The teacher and the principal, then, become highly important factors in research. It is seldom that the teacher or principal has an opportunity for this work, because of other duties they have to perform, it was stated.

"The District School" is passing from the scene of American educational activities to be superseded by a more centralized system of control, the Bureau of Education has concluded as the result of a study of administration of schools in the various states. The larger unit has been made necessary for school taxation purposes.

MANY ALIENS BARRED

During the month of February, 1,308 aliens were refused admission to the United States, the smallest number for any month of the current fiscal year. Failure to present proper immigration visas was the principal cause of debarrment during that month, 1,245 aliens, or 95 per cent of the total, having been rejected for this reason, and the major portion of those debarred at stations along the international land boundaries.

"Irregular arrivals" among aliens entering the United States subsequent to June 30, 1924, who are attempting to become citizens although admitted for temporary residence only, or in the country illegally, totaled 181 during the month of March, T. B. Shoemaker acting commissioner of naturalization of the Department of Labor, announced recently.

PLEBISCITE VETOED

Holding that the "Act to Hold a Plebiscite of the People of the Philippine Islands on the Question of Philippine Independence," which was passed by the Philippine legislature recently over the veto of General Wood, would not give the people a chance to express their views, but require them to vote "yes" or "no," President Coolidge has vetoed the Act. President Coolidge stated, in vetoing the Act, that the plebiscite would involve a considerable expenditure, and would not be convincing. It was the president's belief that a plebiscite on the question would tend to divert the attention of the people towards the pursuit of political power "rather than to the consideration of the essential steps necessary for the maintenance of a stable, prosperous, well-governed community."

This is the frst time that an American president has exercised his veto over the Philippine legislature, and marks a new step in the development of the relationship between the two peoples.

YOUTHFUL SUICIDES

Varius writers and publicists have endeavored to read into the record of recent suicides by girl and boy students some sinister portent of a decadent generation. There is little to wararnt such somber conclusions.

Life is full of coincidences, which if taken too seriously may become unduly disturbing. As a fact, the recent youthful sucicides represent such an infinitesimal percentage of youth that it is in the larger view relatively unimportant.

As one of the writers recently pointed out, some of the greatest characters in history have contemplated suicide during times of depression, as was the case with Napoleon and Lincoln. Most of them thought better of it and decided to fight life's battle to its normal end.

Suicide has always been, and perhaps always will be, the resort of a certain proportion of human beings. Perhaps if we were to know how many had at one time or another furitively considered such a step, we might be appalled by the possibilities. That more who think about it do not in a moment of aberration actually attempt the "rash act" is really the remarkable thing.

NEED FOR CRUISERS

Need for additional light cruisers in the United States navy was demonstrated during the recent maneuvers of the scouting fleet in the Guantanamo Bay area, according to Assistant Secretary of the Navy T. Douglas Robinson, who has just returned from a review of the war problems.

Destroyers, he said, cannot replace cruisers because of their inability to make speed in heavy weather. During the maneuvers, he declared, the weather was stormy and the seas rough, with the result that the destroyers were inefficient as scouting arms of the fleet, whereas the heavier cruisers would have been able to navigate in an efficient manner.

Lieutenant R. M. Byrd of Charleston drew thirteen spades in a bridge hand, but rather spoiled the story by refusing to drop dead.

It is reported that a Vermont mountain is to be named for the President's Spokesman.

Culprits are literally "sent up" at Shreveport, La., where the jail is on the top floor of the court house.

FATHER OF RURAL MAIL

Rural free delivery of mail is now so generally established throughout the country that the farm boy and girl of today take it for granted, and few of them know that its first beginnings was only thirty years ago.

Perry Sanford Heath, a newspaper man who died a few days ago at the age of 69, was the father of rural free delivery. Through his activity in behalf of McKinley's election in 1896, Heath became first assistant postmaster general in 1879. With only $30,000 of an unexpended appropriation for experimental purposes to begin with, he established a few rural routes. The farmers liked the idea, and through Heath's persistence Congress was induced to appropriate more and more funds for the extension of the service.

As a direct result of his vision and zeal, the system of rural free delivery, which now serves more than thirty million persons, has become one of the greatest blessings which the government confers upon the public.

Every rural mail box in the land is a modest monument to Perry Heath.

POPULAR FALLACIES

After an erroneous statement has been repeated often enough, it is next to impossible to eradicate it from the popular mind.

For many years the question was asked why the addition of a fish to a pail of water would not add to the weight of the bucket and its contents. Several ingenious explanations were offered, but the real reason could not be agreed upon. Finally some inquisitive skeptic weighed a bucket of water and after adding a five-pound fish, weighed it again. It weighed just five pounds more than it did before adding the fish. The question, therefore, was shown to be based upon a false assumption.

A similar situation is pointed out by the Christian Science Monitor in answer to the question of why the younger generation is so much inclined to crime. Thirteen cities reporting to the United States Children's Bureau showed that in nine of them juvenile delinquency decreased last year, while an increase was noted in only four.

Likewise, it is popularly supposed that crime in Chicago is more prevalent than ever before. Yet actual statistics show that crime since 1915 in that city has not increased in proportion to the increase in population.

It is unwise to jump at conclusions or take too much for granted.

Eleven Senators and fifty-three Representatives retired to private life at the close of the past session of Congress.

H. H. H. Harrison is a naval aviator, although we might have supposed he was the originator of the 4-H Club idea.

NOTICE OF TRUSTEE'S SALE OF REAL ESTATE.

WHEREAS, on the 27th day of October, 1926, G. A. Roth and Nellie Roth, his wife, made, executed and delivered to Rudolph Mohr, Jr., and Howard E. Mohr, as Trustees for Moneta Investment Company, a corporation, a Deed of Trust dated October 11, 1926, as security for their certain joint and several promissory note for the sum of Eight Hundred and Fifty Dollars ($850.00), dated October 11, 1926, which said Deed of Trust was recorded on the 6th day of November, 1926, in the office of the County Recorder of the County of San Mateo, State of California, in Volume 274 of Official Records at page 135 thereof; and

WHEREAS, default having been made by said G. A. Roth and Nellie Roth, his wife, in the payment of the principal and interest due and payable under the terms of said promissory note, and in the performance of the obligations specified in said Deed of Trust to be performed, and the said Moneta Investment Company, a corporation, having on the 8th day of January, 1927, recorded in the office of the County Recorder of the County of San Mateo, State of California, in Volume 268 of Official Records at page 178 thereof, a notice of breach of obligation and election to sell under said Deed of Trust, and having more than ninety (90) days and more than three months thereafter, made on April 11, 1927, written demand upon the undersigned, Rudolph Mohr, Jr., and Howard E. Mohr, as Trustees under said Deed of Trust, to sell the real property therein and hereinafter described, to satisfy said indebtedness, and to accomplish said trust,

NOW, THEREFORE, pursuant to said demand and in accordance with the power and authority conferred upon them by the said Deed of Trust, the said Rudolph Mohr, Jr., and Howard E. Mohr, as such Trustees, do hereby give notice that on Saturday, the 7th day of May, 1927, at the hour of eleven o'clock A. M. of said day, at the main entrance of the Daly City Hall, 51 Wellington Street, in Daly City, County of San Mateo, State of California, they will sell at public auction to the highest bidder for cash, in lawful money of the United States, all that certain parcel of land described in said Deed of Trust and situate, lying and being in Daly City, County of San Mateo, State of California, and particularly described as follows:

Lot Twenty-four (24) in Block Fifteen (15) as designated on the map entitled "Map No. 2 Vista Grande," which map was filed in the office of the Recorder of the County of San Mateo, State of California, on February 4, 1907, in Volume "C" of Maps at page 14 and a copy thereof entered in Volume 4 of Maps at page 52.

This property is sold subject to the following prior encumbrance:

Deed of Trust for Four Thousand Dollars ($4,000.00) dated October 11, 1926, G. A. Roth and Nellie Roth, his wife, to Anglo California Trust Company, a corporation, as Trustee for Moneta Investment Company, a corporation, recorded November 6, 1926, in the office of the County Recorder of the County of San Mateo, State of California, in Volume 272 of Official Records, at page 169 thereof.

Terms of Sale: Cash in lawful money of the United States, ten per cent payable to the undersigned Trustees at the fall of the hammer; balance payable within ten days thereafter at the office of said Trustees, Speedway Building, No. 116 9th Street, San Francisco, California; and if not so paid, said ten per cent to be forfeited and the sale to be void. Acts of sale at purchaser's expense.

Dated, April 15, 1927.

Colma News Notes

Little Norma Cassentini is ill at St. Luke's hospital with acute appendicitis.

On Saturday evening, May 7, the Colma Community Center will hold its usual monthly whist in the Center hall.

Mr. M. Coupley is recovering from his recent operation. His friends are pleased to see him up and around again.

Thelma Selmi and Emilio Feretti, both of Colma, will be married at St. Maximus church, Daly City, next Saturday, April 23.

The Girls' Club of Colma held an informal whist party for its members Thursday evening at the home of Mrs. M. P. Henderson.

Mr. and Mrs. H. Lorenz and daughter Alice, with Mrs. C. Conserva and daughter Eleanor, motored to Santa Cruz last Sunday.

Mrs. P. Schinazy will entertain the members of the Colma Girls' Club on Thursday, May 5, at a dinner at her home.

The children of Holy Angels' church are working hard on the May Day festival to be held May 19, 20 and 21, in the Colombo auditorium.

Mr. and Mrs. E. Boetlo and charming little daughter Victorine, of San Bruo avenue, spent a pleasant day at Menlo Park and vicinity during the latter part of last week.

The Easter services at Holy Angels' church were attended by a large number of devoted worshipers. Year by year the services increase in beauty and attendance.

The work on Mrs. M. P. Henderson's home and the grounds is progressing rapidly. The hedge on one side has been cleared away, the garden tastily arranged and a wide gravel walk laid.

Officers were elected by Olive Grove No. 116, United Ancient Order of Druids, on Tuesday, April 19, and will be installed on Tuesday, May 3, in Jefferson Hall.

According to Dame Rumor, Colma is about to lose another of her popular bachelors in the person of Joe Garibaldi, whose engagement was recently announced.

Glen Olmo, only son of Mr. and Mrs. Pete Olmo, of Mission street, who was very sick and confined to his bed for a week under the doctor's care, is about again and will resume his studies in San Francisco this week.

Ernesto Granucci, youngest son of Mr. and Mrs. U. Granucci, of Colma, spent the week with his family and friends. He has returned to San Jose, where he is attending the San Jose Union College.

The next regular monthly whist party for the benefit of St. Maximus church will be held in the Daly City Auditorium, Tuesday evening, May 3. Mrs. Margaret Callan Steele, chairlady, and her committee, are preparing for a record attendance.

Miss Rogers is receiving great backing in her race for queen of the Druids' May Festival. The festival will be held in the latter part of May in the Civic Auditorium, San Francisco. Both Olive Grove and Cypress Circle are working hard for her election.

Miss Mary Glendora, of San Francisco, was married to August Benassini, of Colma, Monday morning at 8 o'clock, in St. Monica's church, San Francisco. They have left for a trip to Los Angeles and are driving down and back. August has lived here for years and has always been very popular.

Miss Anita Witt, daughter of Mr. and Mrs. Albert J. Witt, of Colma, was married to Dr. Harold J. Heitman, of San Francisco, at 2 o'clock Sunday afternoon in St. Mark's church, San Francisco. They have left on their honeymoon trip in the northern part of the state, and when they return will take up their residence in the Excelsior district.

Miss Evelyn Lafrance, recently of Colma, was married to Mr. Albert Witt, Jr., of Colma, Sunday morning at St. Mark's church, San Francisco. Later in the afternoon they attended the wedding of Mr. Witt's sister, Anita Witt. The newly wedded couple will take up their residence close to the State Theatre. The bride lived for a number of years in Colma.

Raymond Batz, son of Mrs. Beatrice Batz, bookkeeper for M. Belli & Co., of Colma, left a week ago Saturday on the President Garfield on an around-the-world tour. He is going as a musician, leading his own orchestra. All the members of the orchestra were formerly of the Lowell high school in San Francisco. It will be a great trip for the boys, and their selection for the trip is a compliment to them.

On Friday evening, May 6, Olive Grove No. 116, U. A. O. D., will install the following officers for the ensuing term: Noble Arch, William Lagomarsino; Vice-Arch, Ed Mooney; Noble Ovate, Wm. Papino; Noble Bard, Fred Bauer; Conductor, Frank Sturla; Recording Secretary, Carl Schwarz; Financial Secretary, W. J. Savage; Treasurer, Louis Nava; Inside Guardian, Pete Benassini; Outside Guardian, Jos. Christian; Trustee, Herman Siemund.

The members of the drill team of El Carmelo Parlor No. 181, N. D. G. W., are preparing for their initial dance, to be given with the drum corps of Niantic Parlor No. 105, N. S. G. W., in the Native Sons' Auditorium, at 430 Mason street, San Francisco, on Saturday evening, April 30. The main feature of this affair will be the exhibition drills by both teams at 10:30 o'clock in full dress uniform. This gives local people an opportunity to see their prize-winning drill team in action. Pete Butti's famous orchestra will provide dance music until a late hour. Show your co-operation and be present on this occasion.

The Colma Fire Department held its regular meeting Thursday evening. No business other than routine work was passed on. As usual, a week of no fires was reported. This is getting too monotonous. Colma, after several years of serious fires, with nearly always a policy of "let it burn," due to no apparatus, gets a fire department and an excellent corps of men and then has no fires. While of course it is excellent that fire prevention is working out so well in Colma, many a youngster's heart saddens at the lack of frequent blazes. Seriously, however, the residents of Colma are justly proud of their excellent fire department, and now feel perfectly safe in case a fire should break out, which they hope will never happen.

John Schenone, who returned from Italy during the latter part of last week and is at present a house guest of Mr. and Mrs. G. Ricci, of San Francisco, made a pleasant call on some of his old-time friends of Colma last week. Mr. Schenone, well known in both San Francisco and San Mateo counties, was greeted royally by all. Very interesting tales have been told by Johnie about his trip to and from Italy. He has done a fair amount of traveling over Europe. Mr. Schenone plans a several months' visit here, and then will leave for Ricco, Italy, where he will join his wife, nee Teresa Ferecchio, and his two sons, John, Jr., and George, both natives of Colma, and Mr. and Mrs. Ferecchio, parents of Mrs. Schenone. Mrs. Ricci, nee Palmera Ferecchio, sister-in-law of Mr. Schenone, assisted by her husband, tendered John several "welcome home" parties which were enjoyed by all present.

If the continent of Asia were proportionately as well served from a telephone standpoint as the continent of North America, it would have more than 125 times as many telephones as at present.

The Christian Science Monitor suggests training schools for janitors. For one thing, they might be taught to read a thermometer.

NOTICE OF SALE

Special Lien on Personal Property.

Notice is hereby given in pursuance to Section 3052 of the Civil Code of the State of California, the undersigned will sell at public auction on Tuesday, May 10, 1927, at the hour of eleven o'clock A. M., at 252 Irvington Street, Daly City, California, that certain automobile, to-wit:

One Ford Delivery Truck; Engine No. 2527026; California Licence No. 252-113. Owner, J. E. Timpson, 204 Woodrow Street, Daly City, California.

Said sale will be made to satisfy the account of the undersigned for storage and safe keeping of said automobile.

MRS. R. SILICANI.

First publication April 22, 1927.
Last publication April 29, 1927.

NOTICE OF AWARD OF CONTRACT

No. 32.

Pursuant to Statute and to the Resolution of the Board of Trustees of the City of Daly City, State of California, directing this notice:

NOTICE IS HEREBY GIVEN that the said Board of Trustees, in open session, on the 28th day of March, 1927, publicly opened, examined and declared all sealed proposals or bids for doing the following work and improvement in said City, to-wit:

SECTION 1. That Hillside Boulevard, formerly called San Geronimo Avenue, and formerly called San Bruno Avenue, from the easterly line of Mission Street to the easterly extension of the center line of East Vista Avenue across said Hillside Boulevard be graded for a width of eighteen (18) feet lying between the easterly line of said Hillside Boulevard and a line which is parallel with and distant twelve (12) feet at right angles easterly from the center line of said Hillside Boulevard, said grading work shall be done and performed in accordance with the plans, profiles, cross-sections, and specifications therefor, heretofore adopted by the Board of Trustees of said City of Daly City on the 24th day of January, 1927, and now on file in the office of the Clerk of said City, to which plans, profiles, cross-sections and specifications reference is hereby made for an accurate and complete detailed description and location of said work and improvement and the same are hereby made a part hereof;

SECTION 2. And the Board of Trustees of the City of Daly City does hereby determine and declare that the foregoing described work and improvement is of more than ordinary public benefit and will affect and benefit the lands and district hereinafter described, which said district is hereby declared to be the district benefited by said work and improvement; that therefore the entire costs and expenses of said work and improvement shall be and are hereby made chargeable against and shall be assessed upon said lands and district, which district is within the limits of the City of Daly City, County of San Mateo, State of California, and the said district is also within the territory bounded and described by a line described as follows, to-wit:

BEGINNING at a point where the line dividing Lots 13 and 14, Block 1, Map of Crocker-Daly Subdivision, recorded August 11, 1913, in Volume 9 of Maps at page 4, San Mateo County Records, intersects the easterly line of said Block 1; thence South 49 degrees 28 minutes East along the production of said line dividing Lots 13 and 14 to a point distant 200 feet at right angles easterly from the easterly line of Hillside Boulevard, formerly called San Geronimo Avenue, formerly called San Bruno Avenue; thence southerly parallel with and distant 200 feet at right angles easterly from the easterly line of Hillside Boulevard, formerly called San Geronimo Avenue, formerly called San Bruno Avenue, to the production easterly of the southerly line of East Vista Avenue; thence westerly along said production of East Vista Avenue to the center line of Hillside Boulevard, formerly called San Geronimo Avenue, formerly called San Bruno Avenue; thence northerly along the center line of Hillside Boulevard, formerly called San Geronimo Avenue, formerly called San Bruno Avenue, to the easterly line of Mission Street; thence northerly along the easterly line of Mission Street to the above mentioned line dividing Lots 13 and 14, Block 1, Crocker-Daly Subdivision; thence southeasterly along said dividing line to the point of beginning.

SECTION 3. There is excepted from the above mentioned work any thereof that is already done to the line and grade as shown on the plans, profiles, cross-sections and specifications herein mentioned.

SECTION 4. And it is further resolved by the Board of Trustees of the City of Daly City and said Board hereby adopt and establish as the official grades for the work and improvement herein mentioned, the grades and elevations shown and set forth on the plans, profiles, cross-sections and specifications hereinbefore mentioned, which plans, profiles, cross-sections and specifications were heretofore adopted by said Board of Trustees on the 24th day of January, 1927, and to which reference is made for a description of the grades at which said work is to be done and made. All such grades and elevations shown on the plans herein and established by this Resolution of Intention are in feet and decimals thereof above the City base and datum.

SECTION 5. Notice is hereby given that serial bonds to represent unpaid assessments, and bear interest at the rate of seven (7) per cent per annum will be issued hereunder in the manner provided by the Improvement Bond Act of 1915, as amended, the last installment of which bonds shall mature nine years from the second day of July next succeeding ten months from their date.

SECTION 6. Except as hereinabove otherwise provided for the issuance of serial bonds, all of the above proposed work shall be done in pursuance of the Improvement Act of 1911, as amended.

Reference is hereby made to Resolution of Intention No. 32 of said Board of Trustees, declaring its intention to order said work to be done, with further particulars, which Resolution of Intention is on file in the office of the City Clerk of said City, and

NOTICE IS HEREBY GIVEN that said Board of Trustees, thereafter, to-wit: March 28, 1927, awarded the contract for said work to the lowest responsible bidder, to-wit: GUERIN BROS. at the prices named for said work in their proposal or bid on file.

Dated: April 11, 1927.

A SPLENDID DINNER

There were many famous Easter dinners heartily enjoyed in this locality on last Sunday. One very notable repast was that served by Mrs. Ernesta Belli and her family, of Colma.

About forty guests sat around the table, which was laden with the choicest dainties of the season. Besides the members of the different related families, there were present Mr. Austen, a U. S. Postal Inspector; Dr. Grant and Dr. Degratsia, of San Francisco, and two very interesting nurses from St. Luke's hospital, while W. J. Savage helped out as toastmaster. It is needeless to say that great merriment ruled the occasion.

There is not another hostess in the whole state that takes such great interest in her dinners as Mrs. Ernesta Belli.

"Men of Steel" is coming to the State Theatre, being scheduled for Wednesday and Thursday, April 27 and 28. This is a picture that has received warm praise, Milton Sills and Doris Kenyon being featured. There will be other attractions well worth your time.

NOTICE OF SALE

Special Lien on Personal Property.

Notice is hereby given in pursuance to Section 3052 of the Civil Code of the State of California, the undersigned will sell at public auction on Thursday, May 5, 1927, at the hour of eleven o'clock A. M., at that certain place of business, Jefferson Motor Car and Tire Company, 6231 Mission Street, Daly City, California, that certain automobile, to-wit:

One Chevrolet Touring; Engine No. E-61700; California License No. 792-157. Owner, E. A. De Lue, 225 California Street, San Francisco, California.

Said sale will be made to satisfy the account of the undersigned for storage and safe keeping of said automobile.

JEFFERSON MOTOR CAR AND TIRE COMPANY.

First publication April 15, 1927.
Last publication April 22, 1927.

NOTICE OF TIME APPOINTED FOR PROBATE OF WILL.

In the Superior Court of the State of California, in and for the County of San Mateo.

Probate.—No. 4172.

In the Matter of the Estate of Robert Nelson, Deceased.

Notice is hereby given that Thursday, the 12th day of May, A. D. 1927, at 10 o'clock A. M. of that day, and the Court Room—Probate—of said Court, at the Court House in Redwood City, in the County of San Mateo, State of California, have been appointed as the time and place for proving the will of said Robert Nelson, deceased, and for hearing the application of Margaret Nelson for the issuance to her of Letters Testamentary thereon.

(Seal.) ELIZABETH M. KNEESE, Clerk.

By Nancy Andrews, Deputy Clerk.

W. H. Clay, Attorney for Petitioner, 600-603 Pacific Building, San Francisco, California.

Dated April 18, 1927.
First publication April 22, 1927.
Last publication May 6, 1927.

A good recipe well mixed, but the oven wasn't right

The Oven Heat Control assures perfect results

How many times have you followed a good recipe — precisely, carefully in every detail — only to have fair results?

There must be some reason.

Perhaps your stove doesn't measure the oven heat just as accurately as you measure and mix the ingredients. In measuring and mixing you eliminate guesswork. You can eliminate it from baking. For the Oven Heat Control on the new Gas Range keeps the oven at any temperature you desire.

Let us or one of the local range dealers explain more fully how to bake your costly ingredients perfectly by means of the Oven Heat Control on the new Gas Range.

STORY FROM THE START

While despondent over the enforced hiding of her fiance, Jim Dallas, slayer in self-defense of Homer Parkinson, Sybil Saunders, popular actress, is engaged to play Viola in a charity performance of "Twelfth Night" on Gull island, on the Maine coast. After the play Hugh Bassett, Anne Tracy's fiance, tells Joe he has heard he is spying on Sybil to learn the whereabouts of Jim Dallas and earn the reward offered by the Parkinson family. The boy denies it. To Anne he betrays his enmity toward Sybil. Stokes tells Sybil he has news of Dallas, and to secure privacy they arrange to meet in a small summer house. Flora Stokes tells Bassett she saw Sybil shot but did not see her murderer. Bassett notified the sheriff, Abel Williams. The latter suspects Flora Stokes.

CHAPTER V—Cantinued

—9—

"I'd rather Mrs. Stokes went up to the second floor." He turned to Bassett, "You have space up there, I suppose?"

"Space!" It came from Miss Pinkney before Bassett had time to answer—these hirelings of the law did not realize where they were. "We've put up more people here than you could get into one of those flea-bitten hotels up your way."

"Take her things up there. You help her."

Flora turned stricken eyes on her husband. He said nothing but very gently loosened her fingers on his arm. They trailed away, Miss Pinkney stalking ahead. Mrs. Cornell and Anne made their exit by the opposite door. Both were silent as they climbed the stairs. Mrs. Cornell's door opened and closed on her, and Anne fared on to hers on the side stretch of the gallery. She looked down into the lighted room, saw Shine move toward the entrance, heard his voice, loud and startled:

"Why, there's someone down by the dock!"

The other men wheeled sharply, on the alert. She stopped, head bent, listening.

"Patrick—the d—d fool." It was Williams. "Told to watch the causeway and standing up there like a lighthouse."

"Oh, it's your man. I'll go down and tell him." Shine wanted to help all he could before his retirement to the butler's bedroom. "He ought to be where he won't show, is that it?"

"Yes, tell him to stow his carcass somewhere out of sight. He ain't there to advertise the fact he's on guard."

"If he gets in the shadow under the roof of the boathouse," said Bassett, "he can command the whole length of it and not be seen from either side."

"That's the dope. The neck of this bottle's the causeway and it's going to be corked good and tight tonight."

Anne's door closed without a sound. The three men turned back from the entrance. "Is that woman gone upstairs yet?" Rawson murmured to his assistant as Williams stepped to the middle of the room and watched the gallery. He continued to watch it till Flora and Miss Pinkney appeared and finally were shut away behind their several doors, then he looked at Rawson and nodded.

"Now," said the district attorney to Bassett. "I want you to show me where that pistol was."

Bassett indicated the desk:

"In the third drawer of the desk. Miss Pinkney is certain it was there this morning."

"And you know it wasn't there when you looked after the shooting?" Rawson went to the desk as he spoke.

"I can swear it wasn't."

Rawson pulled out the drawer and thrust in his hand.

"Well, it's here now," he said, and drew out a revolver.

He held it toward them on his palm. They stared at it, for the moment too surprised for comment. Rawson broke it open; there was one empty chamber.

"Can we get into some room where there's more privacy than this place?" he said. "I want some more talk with you, Mr. Bassett."

Bassett directed them to the library. He put out the living room lights and followed them.

CHAPTER VI

Bassett was prepared for what he had to tell. During the long wait for the officers of the law his mind had been ranging over it, shaking bare from unnecessary detail the chain of events that had ended in murder. It was impossible to conceal the situation between Sybil and the Stokeses; he could not if he had wished it, and he did not wish it. A girl had been brutally done to death, a girl innocent of any evil intention, and his desire to bring her murderer to justice was as strong as either Williams' or Rawson's. And they could get the facts better from him than from the muddled stories of the others, their minds clouded by prejudice and hearsay. He hoped that what he said would be coldly unbiased, the naked truth as he knew it. That his revelations would involve a woman whom he liked and pitied would not induce him to withhold what ought to be known. Chivalry had no place in this great drama.

Sitting by the desk in the library he unveiled the situation, what he had heard, seen and knew. The men gave an unwinking attention, now and then stopping him to plant a question. The trend of Williams' thoughts was soon revealed—he suspected Flora Stokes. When the matter was thrashed out he came to an open admission with the remark:

"Well, you have only one person here who had the provocation necessary to commit murder."

Bassett made no answer. If his duty required him to tell all he knew, it did not require him to give his own opinions.

Rawson, who was smoking, his long, loose-jointed frame slouched down in an armchair, took his cigar from his mouth:

"Of course the woman's the first person you'd think of. She had the necessary provocation and the state of mind. But the way she came in and told them—as Mr. Bassett describes it—doesn't look to me like a guilty person."

"Why not?"

"Sounds too genuine, too like real excitement."

"Don't you think it's natural to get excited if you've killed someone?"

"Yes, but not just that way."

Williams leaned over the arm of his chair:

"You got to remember something about these people, Rawson—and it counts big—they're all actors."

Bassett spoke up quickly:

"No, she wasn't acting. You'd have known that if you'd seen her. What

And the Boat—the Boat With Only Gabriel in It.

she did was natural—a woman suffering from a fearful shock."

"Couldn't an actor put that on?"

"Yes, some could, but I'm certain she wasn't."

"When Stokes came into the room after the shot," said Rawson, "how did he behave?"

"He seemed all right. But I can't honestly say that I noticed him much."

"Oh, rubbish!" Williams made a rolling motion in the scoop of the big chair. "You can't suspect the man; he was in love with her. He didn't want to kill her, he wanted to keep her alive."

"Men do kill the women they love, especially when they can't get her."

"Yes, they do. I've known of such cases. But that's impulse. This was premeditated." The sheriff pointed at the revolver lying on the desk. "Some time to day somebody located that gun, took it for a purpose—not to shoot seagulls as you thought, Mr. Bassett."

Rawson looked at the pistol:

"Premeditation, all right. Was there anybody in the outfit who didn't know you'd opened that drawer and found the revolver gone?"

Bassett considered:

"Stokes didn't know. He came in after I'd shut the drawer. I didn't speak of it because just as I'd got through asking him if he'd seen anyone, we heard Mrs. Stokes' scream."

"And she didn't, of course," commented Williams.

"While you were running round at the point the house was empty?"

"I think Mrs. Stokes was here all the time. I never saw her outside."

"Any of the others come up?"

"I'm not certain of all of them. I know Shine did; I sent him back to phone over to Hayworth for the boats. And Stokes did, he came up for the electric torch when I was in here telephoning to you."

"Then neither of them knew the loss of the revolver had been discovered and they had plenty of opportunity to return it to the desk?"

Bassett nodded, and after a minute's cogitation Rawson went on:

"Doesn't it seem odd to you that no one saw Miss Saunders when she came back to the house?"

"No. They were all in their rooms, except Shine, who was down at the Point, and Mrs. Stokes, who was reading on the balcony. I asked her particularly if she'd noticed Sybil pass and she said no, she'd been interested in her book and wouldn't have noticed anybody."

"I'd give a good deal to know what Miss Saunders did in that time. I think it would let in some light."

"How so?"

Rawson narrowed his eyes in contemplation of an unfolding line of thought:

"Well, what took her out again to the Point after she'd come in? She hadn't a good deal of time and she wanted to change her clothes before supper. It looks to me as if she met someone in the house, someone who wanted her to go down there with them."

"Mrs. Cornell says she was alone."

"She might have started alone and gone to meet them."

"Then it couldn't have been Stokes," said Williams, "for Mr. Bassett says she wouldn't speak to him if she could help it."

"That's right," Bassett nodded in agreement. "She'd never have made a date with him. She shunned him like the plague. If you knew her you wouldn't see anything in that going out. She was restless and unhappy and the place here—the sea, the views—fascinated her. It was our last evening and it was like her not to want to miss any of it, slip out for a minute to enjoy the end of it."

"And came upon someone waiting for her—lying in wait and—"

Rawson did not finish. A thud and crackling crash came from the living room. The three men rose with a simultaneous leap and ran for the door.

CHAPTER VII

Of all the people gathered in the house that evening Anne had been the most silent. Her ravaged face, the contours broken by gray hollows, bearing the stamp of shock and horror, had been unnoticed among the other faces. Now and then a pitying glance had been directed to her, grief as Sybil's friend must have added a last unbearable poignancy to the tragedy.

After her question to Flora her mind had seemed to blur and cease to function. She had run from the house not knowing what she did, gone hither and thither with the others, looking, speaking, listening in a blind daze. It was not till they returned to the living room that her faculties began to clear and co-ordinate.

Her thoughts circled round the image of Joe as she had last seen him—the vision of him as someone strange and sinister. And the boat—the boat with only Gabriel in it—it kept coming up like a picture revolving on a wheel—going and returning, going and returning. Had he stayed, and what for? That question revolved with the picture of the boat.

She thought of telling Bassett and gave that up—with the police expected she could not get him alone, and why add to his burden with her suspicions? Yes, that was what it was—nothing but a suspicion. She had no certainty; Joe might have been in the boat, Joe might have got off the island some other way. Tomorrow something might come to light that would make these hideous fancies seem like the dreams of delirium. That was the state of mind she tried to maintain when she went upstairs and overheard a man was on guard at the causeway.

(TO BE CONTINUED.)

She Won in Spite of Lulu

By JANE OSBORN

AFTER Eleanor Pickett had worked as stenographer in the insurance office of Mansard & Son she had to admit that she was in love with young George Mansard, and she had, moreover, to admit that she was jealous of Lulu Otis, the plump, strawberry-blonde grass widow who sat at the telephone switchboard in the outer office of the Granger establishment, and spoke of herself as Mr. Mansard's private secretary. The fact that Eleanor took Mr. Mansard's dictation and had got so that she could attend to much of his correspondence alone made no difference to Lulu. Lulu insisted on taking charge of him. There was something unmistakably magnetic about Lulu and Eleanor tried to stifle her jealous feelings when Mr. Mansard loitered in the outer office exchanging slangy badinage with the buxom Lulu.

"You're terribly old-fashioned," Lulu had told her, on several occasions, and one day she added: "If you want to get in right with the boss you've got to show more pep. Of course while I'm here all he expects of you is to take his dictation, but if I were to leave, why he'd want a private secretary. I'd like to see you get the job, but you've got to remember that a man like Mr. Mansard needs a private secretary with an awful lot of pep—someone to kind of buck him up."

"But you're not thinking of leaving?" asked Eleanor timidly.

"Well, you know, girlie—a girl like me doesn't intend to work forever. I've only just got my freedom—" By freedom Eleanor knew that Lulu referred to her divorce papers which she had received only a few weeks before. "And I'm not going to be in too big a hurry this time."

Eleanor felt her cheeks burn with suspicious jealousy. She had seen Bob Mansard talking for a full half hour with Lulu that very morning.

"You know I always wear earrings to the office. Personally I think it's worth while to doll up a bit. The boss likes it and a lot of nice fellows come in here all the time. Of course you've got a nice complexion but just a bit of make-up does help a girl's appearance an awful lot—"

The next morning Eleanor purposely reached the office ten minutes ahead of her usual time of arrival so that she could be seated at her desk before Mr. Mansard or Lulu arrived. She didn't want to be too conspicuous in her new earrings.

But apparently the bit of makeup or the earrings did make a difference because when Bob Mansard came into the room he whistled.

"Why the war paint?" he asked in a tone of upusual familiarity. "And, great scot, dingle-dangles on your ears besides."

"Don't you like them?" asked Eleanor putting her hands up to the earrings.

"Oh, they're all right—only I think I like you better 'au naturel.'"

Eleanor swiftly pulled off the earrings and tucked them into the drawer of her desk.

"I didn't think you cared as much as that what I thought," said Bob Mansard, and Eleanor merely looked up at him with a smile.

Weeks and months went on and the situation so far as Eleanor and Bob Mansard were concerned went on without change. It seemed, however, to Eleanor as if she noted signs of increasing intimacy between him and Lulu. Doubtless now that she had really gained her "freedom" he was courting her in good earnest. Then came one Saturday morning, when Eleanor could not fail to see an unwonted brilliance in Lulu's eyes.

"Heard the excitement?" Lulu asked Eleanor and then went on to explain. "I'm leaving for good in a few hours, girlie. I just came around to sort of say good-by. I'm going to get married Monday."

"I—hope you'll be very happy—Oh, I'm sure you will," stammered Eleanor, and then dreading the answer to the question——"May I know the name of the lucky man?"

Lulu's "You ask Mr. Mansard after I've gone," left no doubt whatever in Eleanor's mind.

Of course Eleanor didn't ask Mr. Mansard anything about it but just went to her desk and worked like a Trojan all the morning. At half-past eleven Bob Mansard drew up a chair beside her desk and dropped limply into it.

"She's gone at last," he sighed "Lord knows how I've been looking forward to this moment."

"You mean—Mrs. Otis—Lulu?" asked Eleanor timidly.

"Lulu, indeed," said Robert. "And now Eleanor I'm going to make a long story short. I've loved you from the first day you came—but I've never dared tell you until now."

"But why did you have to wait?" she asked bewildered.

"Because I couldn't bear to be alone here with her—with Lulu. I was afraid she would never leave. You've no idea how she bossed me and bothered me before you came, and I didn't dare discharge her."

"But I thought she thought you were one of the strings to her bow—"

"Maybe she did," sighed Bob Mansard, taking Eleanor's little hand in his. "But I introduced her to a susceptible friend of mine with a load of money. But don't let's talk about them—Eleanor—please tell me you love me a little."

FACTS *about used car allowances*

MOST new car sales now involve the trading-in of a buyer's used car. More and more people are asking: "Why should my used car seem to have several values? . . . Why should dealers in different makes of cars offer me allowances differing materially? . . . Does the largest allowance offered mean the best deal for me?"

Here are basic facts:

1 Your used car has seemingly different values because competitive dealers are bidding to sell you a new car.

2 Your used car has only one fundamental basis of value: what the dealer who accepts it in trade can get for it in the used car market.

3 The largest trade-in allowance which is offered on your used car is not necessarily the best deal for you. Sometimes it is; but sometimes it is not.

4 An excessive allowance may mean that you are paying an excessive price for the new car in comparison with its real value.

5 Judge the merits of the new car in comparison with its price, including all delivery and finance charges. Then weigh any difference in allowance offered on your used car.

When you are ready to trade-in your present car, remember that after all you are making a *purchase* and not a *sale*. You are buying a *new* car and simply applying your present car as a credit toward the purchase price of the new car.

Few Have Ever Found Humming Birds' Nest

Comparatively few people ever have the pleasure of peeping into a humming bird's nest, to behold two tiny eggs like round white beans, or to see two birdlets which somewhat resemble little beetles.

In the first place, the nest is so small and so resembles the surrounding shrubbery that it is easily overlooked. Then, too, it is so cleverly hidden by its wise builders and so disguised in its construction as to require an experienced eye to discover it.

Built of soft, pliant hairs and adorned with bits of moss and feathers, it forms a downy, cuplike, secluded home. The fairy hummer of Cuba, the smallest of all the humming birds, builds a nest so tiny that it can be covered completely with a copper cent. Its eggs look like two little pearls.

The humming bird, more than 500 species of which have been classified, is distinctly American. In the main, it is a tropical bird, as fewer than 20 species are found in the United States.

The one known to residents of states east of the Mississippi is the beautiful ruby throat. Audubon called humming birds "glittering fragments of the rainbow," so gorgeous are they in color.

Novel Club

The members of the "Asparagus club" call themselves a "bunch," but they are hardly that because they are scattered all over the United States and Canada, with a member in London and another in Odenburgh. The members are connected directly or indirectly with the grocery business and it originated among delegates on a train bound for the national convention of the Association of Retail Grocers in May, 1909. It was decided to call it the "Asparagus club," because asparagus is connected with the grocery business and naturally suggests a closely bound "bunch." Then each member was dubbed a "tip."

Rotate Batteries to Lengthen Life

Radio Engineer Explains How to Cut Down the Cost of Operating Set.

A report relative to estimating the life of "B" batteries containing helpful suggestions to radio set owners, has been issued by W. B. Schulte of the Burgess Battery company.

It is suggested that when the total hours of service have reached the computed value that the broadcast-listener remove his detector battery and replace it by one which has been on the amplifier circuit. If later the signals begin to fade, this battery can be removed to the amplifier set and replaced by another which has not been on the detector. The battery service then is distributed between all of the batteries and it is estimated that from 10 per cent to 20 per cent more service hours can be obtained.

It is pointed out that much of the service life of dry cell "B" batteries in receiving sets depends on the conditions of use, together with the type and number of tubes. In this report these various factors are discussed and examples are given.

"The usual 'B' battery is an assembly of 15 small dry cells soldered together in series and sealed in a convenient non-conductive box with terminals at end cells, furnishing a voltage of about 22½," said Mr. Schulte. "Some units have 30 cells of 45 volts, but 15 cells is usually considered the standard for a 'B' battery.

"'B' batteries have heretofore been designated by 'large,' 'medium' and 'small,' and it has been generally understood that the largest battery would last longer than the smallest. A simpler classification is used in this report, in which the batteries are grouped according to the approximate weight of a 22½-volt unit.

Service Characteristics.

"The characteristics of a 'B' battery, which are of most importance to the broadcast listener, are: shelf or storage life, service hours, noiselessness, uniformity.

"The shelf or storage life of a battery is its ability to retain its service-hour capacity while standing idle either before use or between periods when it is in use. A good shelf life is, of course, desirable to enable the broadcast listener to receive the maximum service from the batteries he purchases and to extend the hours of service when he is not using his batteries regularly.

"The service hours is the total time that a battery will deliver the necessary current before it must be discarded from the set as being no longer useful. High service hours are therefore necessary for economical operation.

"Noiselessness in a battery is a difficulty determinable characteristic and it indicates that the battery is free from minute voltage fluctuations which, by action through the tubes, cause noise in the phones. Noiselessness is a quality closely connected with the nature of the chemical mix, the cell zinc can construction and the cell insulation, and obviously a noiseless battery is to be desired.

Uniformity Important.

"Uniformity is a quality of no small importance. It is impossible to manufacture all batteries absolutely alike, but the ability of the manufacturer to control the process is measured by the uniformity of the batteries.

"The shelf life of a battery is determined from a study of many batteries which are regularly examined or tested at various ages. For example, batteries of various ages can be tested by different methods and the voltage or service hours determined and the average results plotted as a curve showing the percentage of the initial value at different ages. There is only a slight falling off during the first months. The heavier the batteries the better shelf characteristics they will possess.

"Inasmuch as the average 'B' battery is put into service within a few months after manufacture, the broadcast listener need not fear a serious loss due to shelf depreciation," said Mr. Schulte.

"A good shelf life characteristic is obtained by perfect insulation between cells, which allows no internal cross currents and a resulting decrease in service-hour capacity. Excessive heat during storage lowers the shelf life by drying out the chemicals in the battery. Impurities in the chemicals will likewise cause the cells to lose their capacity through internal action.

Current Not Constant.

"The current from a 'B' battery to a tube does not remain constant but drops off as the battery voltage decreases. Therefore to estimate the service hours of batteries on various tubes it is necessary to know the average working voltage of the batteries as it drops from the initial value to the end point of 17 volts. The average working voltage may be considered as the average between 22 volts and the end voltage of 17 volts—that is, the average working voltage of one battery dropping to 17 volts is 19.5 volts. The 45-volt unit reaches the end of its usefulness when the voltage reaches 37 volts. 'B' batteries should always be tested with a voltmeter after they have been in operation for an hour or two, otherwise they will show a deceptive reading, because they recuperate while idle."

Radio Electrical Terms That Are in Common Use

The words ampere, volt and ohm are continually being mentioned in connection with radio. In order to clear up any misunderstanding among radio fans, some simple definitions, which are reprinted from Radio Broadcast Magazine, are given here. The first two terms are explained by means of hydraulic analogies:

"Ampere—A current of water in a pipe is measured by the amount of water that flows through the pipe in a second, such as 1 gallon per second, or 10 gallons per second, etc. Electricity is measured by the amount of current that flows along a wire in one second. This quantity is known as the coulomb, and if this term is used, we would express the current as 1 coulomb per second or 10 coulombs per second, etc. In electricity, however, we have a special name for the rate of flow of 1 coulomb per second which we call 1 ampere. Thus, 8 amperes is the same as 8 coulombs per second. Ampere, then, is a term defining the quantity of current that is flowing per unit of time.

"Volt—The number of gallons per second of water flowing in a pipe, or the number of amperes flowing in a wire, depends upon the pressure under which it flows. The electrical unit of pressure is the volt. A volt means the same thing in speaking of a current of electricity that a pound pressure means in speaking of a current of water. It follows then, that the greater the pressure (voltage) at the supply, the greater will be the flow of current.

"Ohm—There is no hydraulic unit which corresponds to the ohm, which is a measure of the resistance of a wire to the flow of current. A wire is said to have 1 ohm of resistance when a pressure of 1 volt will cause a current of 1 ampere to flow through it. If the resistance were doubled, the current would be halved, etc."

According to the definitions given in Radio Broadcast, then, we see that amperes represent the amount of current, volts the pressure causing this current to flow, and ohms the resistance impeding the flow of current. These three units bear a definite relation to each other. This relationship, named after the scientist who discovered it, is known as Ohm's Law, which states that the number of amperes flowing in a circuit is equal to the voltage of the circuit divided by its resistance.

Gas Bubbles Cause "Boiling"

During the last stages of the charging process the solution in storage battery cells starts to bubble violently, and a little may splash through the vent caps. Do not be alarmed by this, as the agitation is caused merely by the bursting of bubbles of hydrogen formed during the charging action.

Cut Power, Amplification —Way to Get Distance

Like everything else in radio, DX is changing and I find that few radioists are taking this fact into consideration, writes a radio expert. Frequently I am called in to pass judgment on a set and give my opinion as to why it doesn't pull in the distant stations as it should.

In every case lately I am finding the same thing. Operators are groping for distance in the old-fashioned way. They are giving their sets every bit of power they've got and are plugging in every available tube. And that's just what's wrong.

Nowadays the way to get distance is to cut down on power and amplification. That is, if the set is one of the modern multi-tube affairs, power operated and equipped with a power tube in the last stage, or power amplification between the output of the set and the speaker. The change has come about because of two things:

Increased station power.

Increased set sensitivity and amplification.

Put these two together and power may be the stumbling block when seeking DX, because in addition to the station you want you get a half dozen which you don't want. Result: An annoying heterodyne between conflicting waves.

If the owners of newer sets want distance they should strive for selectivity and cut down on amplification in a great many cases.

This Worth Remembering in Operating Your Radio

Remembering not to forget, being one of the real problems of operating radio sets, as in anything, it is well to take advantage of good habits. Much "B" elimination trouble can be traced to letting the unit operate when the set is not working, and to remember to switch off the eliminator it is only necessary to stop the set at the eliminator switch before pulling out the plug to the speaker.

It has been found by watching many radioists that when they switch off at the eliminator first they never forget to pull out the speaker plug, whereas if they start at the plug they are apt to forget to switch off the eliminator.

Three Volume Controls in R. F. Amplifier

The three favorable volume controls in the radio-frequency amplifier are: Firstly, a filament control rheostat in one or more tubes of the RF amplifier; secondly, a high variable resistance in series with the plate circuit of one of the RF amplifiers, and thirdly, a tickler in the detection tube. If two or more of these methods are used in the RF amplifier it will not be necessary to use any volume control in the audio-frequency amplifier.

Washable Silk Is Desirable Fabric

Skirt and Sleeves Interesting Feature of Popular Spring Model.

Crepe de chine, flat crepe and plain or printed georgette are the fabrics for which this dress is particularly planned, but its lines are good for washable silks, pongee, broadcloth or soft cotton. It is designed for the indispensable little frock that may be slipped on in the morning and worn right through the day, says the Woman's Home Companion.

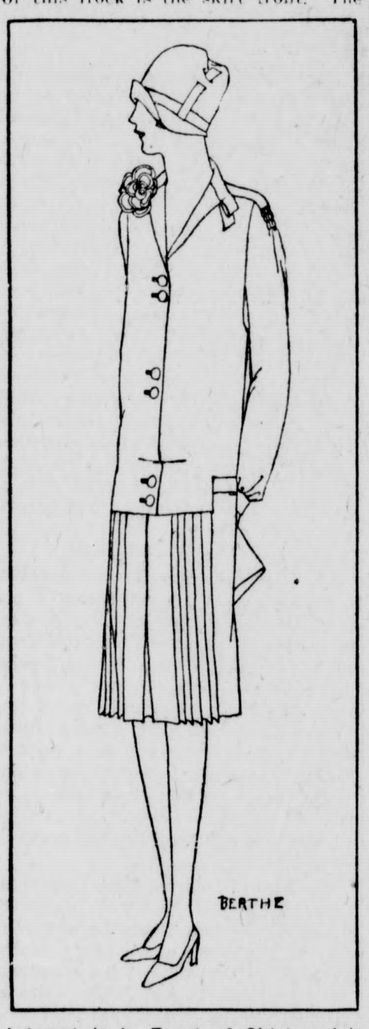
Like so many of the new silk frocks the interest is in the front of the skirt and the sleeves. Long slender shoulder yokes extend just far enough over the sleeves to meet the shirring. The long line of the front closing carries the eye down to the plaits on the skirt while the line at the bottom of the upper part of the frock marks a low waistline at the side and in the front drops to a panel overlaying the plaits.

At the center-front closing the edges are turned back for a facing, lapped and the lower edges joined to the plaited front. The collar, a straight piece plaited at the ends, is joined to the neck after the shoulder yokes are in place. After the sleeves are shirred and the cuffs joined to them they are stitched to the armholes and the ends of the shoulder yokes tacked in place. The sleeve seams and underarm seams close in one stitching.

The dress can be worn with the fronts buttoned fairly high at the neck or open nearly to the plaits and worn with a vest of the same silk.

In the illustration the sash is narrow and passes underneath the front, but this dress follows a design that might have many different finishes. Several suggestions are sketched below the large figures. The small views show the front of the frock opened over a vest and illustrate interesting button arrangement if the front is worn closed.

Perhaps the most unusual feature of this frock is the skirt front. The



Interest Is in Front of Skirt and in Sleeves.

small knife plaits are uniform, but the arrangement is varied by having an inverted box plait at the center of the skirt.

Blues Lead in Pastel Tones for Spring, Summer

A recent report as to fashions worn on the Riviera indicates the marked preference for all pastel shades. Very few strong colors are worn, appearing only in small areas as trimming for white costumes. A similar color situation existed at the winter resorts of Florida where the smart world of America foregathered and where the fashions that achieve success are forerunners of late spring and early summer modes.

The pastel shades worn include pink, fuchsia, orchid, robin's-egg blue, pale blue and pastel green. Blues are probably the most important colors, and range from the pastel tones to those slightly deeper and more on the order of Saxe blue. Green in its softer tones is particularly smart, both used alone or combined with black.

Inserted Ties

Straight and long bodices continue to hold their own in the mode. The bodices have hardly any trimmings because of insertions and yokes. Inserted ties are the novelty in the way of decorations and they are of a very pretty effect; the ties are generally in some contrasting color and in a lighter fabric or in satin on a crepe frock. A frock in black crepe often has a tie with a bow in three shades of beige.

Black and White in the Spring Style Program

Such a furor for the black-and-white compose as is at this immediate moment! There are ways and means without end of interpreting this popular theme, one of the most effective being the black satin skirt topped with a white satin blouse, this applying either to the two-piece frock or the one-piece. The white satin bloused frock in the picture is the very essence of smartness. Note the choker tie-collar, the long snug-fitting sleeves, the narrow belt, and especially the black embroidered cone-shaped pockets—all outstanding style details.

How Neckline Problem May Be Easily Solved

The neckline is often a perplexing problem to the woman who makes her own frocks, but with large and varied displays of neckwear to select from she need only finish off the neck of the frock and adjust whatever collar she prefers. If she has several of these the appearance of her dress will be changed and she will not become "so tired of it."

Among the newest offerings is the surplice collar that extends to the hipline, and the new square collar with the requisite bow at the corner. An exquisite lace collar ties in a bow at the low V and the ends form a rippling jabot. An attractive V collar has a shower of ribbon loops in three colors attached near the shoulder, and the cuffs are similarly adorned. All the mentioned collars have cuffs.

This neckwear combines embroidered batiste and lace, the Valenciennes and Alencon being prominent. These charming collars give a dainty touch to the sheer dresses so much in evidence in advance summer modes, and they give a dressy effect to the print frock that is going to be such a favorite the coming season.

Chic One-Piece Frock Slender and Straight

The increasing vogue of one-piece frocks centers attention upon certain details that give them a distinctly different aspect from the tubelike dresses of several seasons ago. While they are slender and straight in line they achieve an effect of movement and grace by the use of plaits, sometimes stitched part way down, often pressed into place but left free.

Another detail that does away with any tendency toward monotony is the yoke, which sometimes appears only in the back and again may be seen extending far down on the front of the frock. This pointed effect, when combined with a bateau neckline, gives a new line that is distinctly different.

A frock of this type is ideal and may be worn all through the spring. The original is made of crepe satin in the new pinkish beige tone. The yoke is tucked just below the shoulders, while the frock itself is laid in small box plaits held in place with a belt. A flower of the same material is posed on the shoulder.

Black Broadcloth Used for Tailor-Made Coats

Black broadcloth continues to be much used for tailor-made coats. These may have a long-waisted bodice and a flared skirt. The flare is concentrated principally on the sides, and is increased by the use of very thick lynx or light fox fur. The roll collar and the cuffs are also of the fur. Very tailor-made looking coats are also made in satin and in thick crepe marocain, generally in black or dark blue. The roll collars, cuffs, and the edge of the coats are often quilted. Sometimes only the edge is quilted in order that fur can be used for the cuffs and collars. On plain coats sumptuous quilted linings are used.

Ears Are Being Worn

Ears are being worn more and more in Paris this season. Every hair dresser is devising new methods of getting a woman's hair out of the way, either by developing a re-enforced flat curl in front of the ear or by training the hair to stay above or behind it. The bob remains as the standard, but the necessity for exhibiting the ears has led to variations.

Oakland G. A. R. Veteran and Wife Regain Health

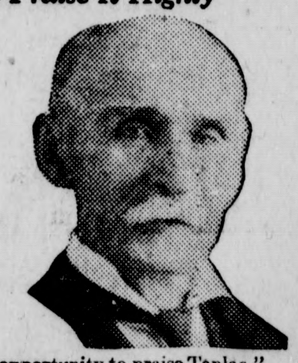
Aged Couple, Suffering Acutely from Rheumatism, Neuritis and Indigestion, Find Quick and Permanent Relief in Tanlac and Praise It Highly

"From the day I was fortunate enough to line up with Tanlac," says Mr. Emil Langhans, ex-cavalryman and retired customs official, "it has kept my health and strength up to highest standard."

Sitting in his comfortable home at 2219 107th Avenue, Oakland, Calif., Mr. Langhans told how Tanlac had rebuilt strength and vigor for himself and his charming wife. "Tanlac worked wonders for my wife," he said. "She suffered from high blood pressure, neuritis and general run-down condition. Tanlac relieved her.

"I had sciatic rheumatism—suffered for five years with it—so that I could sleep but little, on account of the pain. Kidney trouble, indigestion and loss of appetite had reduced my strength to a low ebb.

"Since taking Tanlac my health, as well as that of my wife, has been remarkable. Though I am retired, I could resume my old work any time. No rheumatism—nor kidney trouble—in past two years. I never miss an opportunity to praise Tanlac."



Old and young, from coast to coast, unite in praising this famous remedy of nature. Made of roots, barks and herbs, according to the exclusive Tanlac formula, it is an amazing tonic medicine. All good druggists sell Tanlac. Get a bottle today! Over 40 million bottles sold.

DALY CITY

NEWS NOTES OF PERSONAL INTEREST

By MARC WORST

Mrs. H. O'Connor has recovered from a week's illness, suffering from a severe cold.

Mr. and Mrs. Horns and family visited Mr. and Mrs. J. J. Kennedy and family, of 6799 Mission road, last Sunday.

Mr. and Mrs. Charles Village and son Leslie have moved from 157 Hillcrest Drive, having bought a new home on Brunswick street.

Andrew Murphy attended the wedding of L. Zerga and Miss Gallagher at the home of the latter in Ocean View last Sunday morning.

Mrs. Anna Cochrane and daughter Patsy, Walter Murphy, Henry Romanguire and Earl McDaniels visited friends in San Mateo last Sunday.

A notice appeared on the bulletin board that students of South San Francisco high school will present the Chinese drama, "Cherry Blossoms," in the South San Francisco grammar school auditorium.

Mr. Earl McDaniels spent Easter Sunday with the Murphy family of Hanover street.

Irene Smith has returned after a pleasant week spent at Santa Rosa, visiting Alice Parker, formerly of Daly City.

Mrs. B. E. Gardenier, of 62 Gambetta avenue, is spending a few days at Ross, Marin county, visiting with the J. L. Brown family.

Company No. 3, Daly City Volunteer Fire Department, held a very successful whist party Tuesday evening in the company hall on Westlake avenue.

Mrs. R. F. Emerson, of Peoria street, entertained a number of friends Tuesday at luncheon with a demonstration of the work of the Aluminum Club.

Plans are completed for the big Post-Lenten whist game to be given for the benefit of Star of the Sea church in the parochial hall, Ninth avenue, between Geary and Clement streets, Monday evening, April 25, at 8:45 o'clock sharp.

Edna Hooton, of Los Olivos avenue, was ill last week, but is now up and around.

Mrs. George Berwick, of Como avenue, wife of our poundmaster, was taken to the Community hosiptal at Beresford last week. She has been quite ill, but is improving.

A whist party will be held in the St. Maximus church hall on Wednesday afternoon, April 27, for the benefit of the confirmation children. Mrs. A. Johson will act as chairman.

Mr. and Mrs. J. L. Brown, Master Ralph and Miss Tamsel Brown, of Ross, Marin county, motored to Daly City Monday, and then to Redwood City and Campbell, Santa Clara county.

Rin-Tin-Tin, the wonder dog, will be seen in "When London Sleeps," the feature picture to be presented at the State Theatre tomorrow, Saturday, April 2. The Kiddie Revue will also be a feature on this occasion.

The next regular monthly whist party for the benefit of St. Maximus church will be held in the Daly City Auditorium, Tuesday evening, May 3. Mrs. Margaret Callan Steele, chairlady, and her committee, are preparing for a record attendance.

The whist and dance held by El Carmelo Parlor No. 181, Native Daughters of the Golden West, last Wednesday evening was well attended and everyone had a most enjoyable time. Music was furnished for the dancing by the Nite Owls.

It is almost generally understood that Professor Ferguson, of the Chico high school, will be the new principal of Jefferson Union high school. In Chico he is being congratulated upon securing a very lucratvie position within the confines of the great peninsula, so adjacent to San Francisco and the two well known universities.

Last week Mrs. Simpson, of 784 Bellevue avenue, entertained the following children at an enjoyable house party: The Misses Alice O'Connor, Joan Tway, Ellen Petersen, Dorothy Lewis, Margaret Kohman, Dorothy Pohley, Azalada Kohman, Elizabeth Simpson, Ella Simpson and Bobby Lewis. After the party each child received a nice present.

Charles Aiello was operated on Monday at the St. Francis hospital for acute appendicitis. He is improving and his many fellow students at Jefferson Union high school are wishing him the best of luck and hope soon to see one of the nerviest and hard-fighting athletes of the county return to his place as a baseball, football, soccer, tennis and basketball star.

Recently Mr. Marconi, of Peoria street, Crocker Tract, gave his wife a birthday surprise party. There were about fifty present to join in the celebration, and Mr. Marconi sure knows how, as he spared no expense to make everyone have a good time and feel at home. Both himself and his beautiful wife have a large circle of friends. The home was beautifully decorated for the occasion.

A gift of currents was received by the San Mateo county Red Cross from the children of Greece. The children of Woodrow Wilson school, Daly City, divided their portion into two equal parts. The upper grades will have their currents made into cakes by the girls of the domestic science department and then these cakes will be distributed. One hundred and one dozen current cup cakes were divided among the children of the lower grades.

Jefferson Union high school's 130-pound baseball team defeated the San Jose team last Wednesday at South San Francisco by a score of 10 to 8. The game was a surprise, as Jefferson is suffering a badly injured team. Five principal players are suffering from serious injuries, as follows: Charles Aiello, appendicitis; Morris Plansky, broken arm; Wm. Sweeney, sprained ankle; James Mullen, sprained leg; P. Markovitch, sprained side and back. Despite the handicap, Jefferson's team is fighting bravely and has only two more games to win the county league.

Peter Pavlos, who has been absent from his place of business for some time as the result of an operation, is around town again and hopes soon to be back on the job.

Some of the members of the La Fiesta Social Club attended an invitational dance given by the W. U. Telegraph Co. last Tuesday evening at K. C. Auditorium.

On March 31 a baby boy was born to Mr. and Mrs. Paul Selmi at the Mary's Help hospital. The boy will be christened Paul Richard Selmi. He weighed eight pounds at time of birth.

The double feature bill at the State Theatre next Sunday, April 24, contains one of the funniest comedies of the season, W. C. Fields in "So's Your Old Man," and Fred Thompson in "The Tough Guy."

Edith Roberts and Conrad Nagel in "There You Are" will vie with The Country Store for popular favor at the State Theatre next Friday, April 29. With this combination there will undoubtedly be a large attendance.

The happy Easter week of vacation and recreation has gone by, and the children are nearly all back at school, and where everything was so quiet last week now there is something doing every minute. However, the rest did much good and there is a general desire on the part of both pupils and teachers to get along as well as possible. One teacher couldn't help but remark that she noticed a wonderful improvement in a number of her problems.

Mrs. Ruby O'Connor, of Oakland, Mrs. Lorraine Wall, Mrs. Frances Fricke and Mrs. Helena O'Connor entertained at a dinner party Easter Sunday afternoon at the latter's home on Evergreen avenue. Before dinner the eight children present indulged in an Easter egg hunt, much to the amusement of their elders. Each child was well rewarded for their trouble. The home was artistically decorated with Easter lillies and ferns. There were twenty at the dinner table. The evening was spent in card games, dancing, recitations and singing.

Many people who were unable to go to Sacramento last September to witness our own drill team of El Carmelo Parlor No. 181, N. D. G. W., put on their famous drill that won them the state championship contest, will have the opportunity on Saturday evening, April 30, by attending the initial dance and exhibition drills given by El Carmelo drill team and the drum corps of Niantic Parlor No. 105, N. S. G. W., in Native Sons' Auditorium, 430 Mason street, San Francisco. Music by Pete Butti's famous orchestra. As this drill team is a boost for this community and for the whole county, let us show our appreciation by giving them our whole co-operation. The drill will be put on at 10 p. m., when the young ladies will all don their new uniforms. Be there to give them a hand.

Will Dedicate San Bruno Airport

Dedication of San Francisco's airport at San Bruno, on May 7, will mark the passing of aviation from the experimental stage into an indispensable and commonplace utility in this country commerically, according to the California Development Association. The event will be a part of the great aviation conference which opens May 5 in San Francisco.

WILL OBSERVE FLAG DAY

On June 14 throughout California there is to be observed by every American Legion Post the one hundred and fiftieth anniversary of the birth of the American flag, according to instructions issued by Dr. John F. Slavish, State Commander of the World war veterans' organization.

Special community ceremonies will be held by each Legion Post, and plans are being perfected for one of the greatest testimonials in American Legion history, Commander Slavich reports, following word from Eugene D. Bennett of San Francisco, state chairman of the veterans' Americanization committee of the Legion.

SEVENTH ANNUAL MUSIC WEEK

Music for every age and taste will be included in the many programs which will be offered during San Francisco's seventh annual music week, May 1 to 7. Beginning with a sacred concert on Sunday afternoon, May 1, and concluding with a band contest in which high school bands from all over the state will take part on the following Saturday evening, the Music Week committee has prepared a group of programs that cover the whole field of music.

Telephones Expensive in Japan

When a new subscriber in Tokio wishes to have telephone service, it costs him 1,500 yen, or about $750, for installation alone. After that he must pay regular cost of service. Last year the number of telephones in the United States increased 800,000. If each new subscriber had been required to pay $750 for installation, it is safe to say the increase in number would have been much smaller.

Ole Ruck says it must be hard for the modern mother to smoke a cigarette and put fresh overalls on the baby at one and the same time.

Among the crops which yield best when harvested green are bananas and American tourists.

TO EXCHANGE.—Have automobile, cost $3,100 new, in first class condition, like new car, will exchange for lot in Daly City. Apply 703 Market street, Room 1801. Phone Douglas 8051.

FOR SALE—Four-room cottage, with porch. Newly renovated. Fruit trees and chicken house. Garage. Price $2,750; terms. 74 San Pedro avenue, near Hillcrest Drive, Daly City.

CURTAINS, DRAPERIES, Bed Sets, Table Runners and Pillows made at reasonable prices. Estimates free. Call the Queen Drapery Shop, 79 Vendome avenue, Daly City. Mrs. Lillie Gregory. Phone Randolph 1017.
